| STUDY MODULE DESCRIPTION FORM | | | | |
|---|---|---|--|--|
| Name of the module/subject Energy and Renewable Energy Sources | С | ode | | |
| Field of study Chemical and Process Engineering | Profile of study (general academic, practical) (brak) | Year /Semester 4 / 7 | | |
| Elective path/specialty | Subject offered in: Polish | Course (compulsory, elective) obligatory | | |
| Cycle of study: | Form of study (full-time,part-time) full-time | | | |
| No. of hours Lecture: 2 Classes: - Laboratory: | Project/seminars: | No. of credits | | |
| Status of the course in the study program (Basic, major, other) (university-wide, from another field) (brak) | | | | |
| Education areas and fields of science and art | Ţ. | ECTS distribution (number and %) | | |
| technical sciences | | 3 100% | | |
| Technical sciences | | 3 100% | | |

Odpowiedzialny za przedmiot / wykładowca:

Prof. dr hab. Jan M. Skowronski

e-mail: jan.skowronski@put.poznan.pl

tel. 61 665 36 41

Wydział Technologii Chemicznej ul. Piotrowo 3, 60-965 Poznań

tel.: 61 66 52 303

Prerequisites in terms of knowledge, skills and social competencies:

| 1 | Knowledge | The basic knowledge within mathematics and physical chemistry |
|---|---------------------|--|
| 2 | Skills | Student uses the basic techniques in a laboratory scale |
| 3 | Social competencies | Student understands the need for continuous training and improve his professional and personal competences |

Assumptions and objectives of the course:

Gaining knowledge in term of conventional energy and environmentally friendly renewable energy sources. Mastering the skills of conducting laboratory experiments related to the use of different energy sources.

Study outcomes and reference to the educational results for a field of study

Knowledge:

knows the principles of environmental engineering related to chemical production and waste management [K_W08]

Skills:

able to use the principle of saving raw materials and energy, and by modernizing equipment and processes is achieved favorable economic indicators and reduce the environmental burden [K_U14]

Social competencies:

understands the need for continuous training and improve his professional and personal competences. - [K_K01]

Assessment methods of study outcomes

Rating of written answers within the subjects related to the theme of the laboratory

 $\label{thm:control} \textbf{Current control of knowledge and practical skills, the correction for experimentation during laboratory classes.}$

An assessment of the final report achieved on the basis of experimental results.

A written final credit course.

Course description

Faculty of Chemical Technology

- 1. Conventional energy and methods of reduce the risks associated with this type of energy
- 2. Water, wind, solar and geothermal energy
- 3. Biomass and biogas as a renewable energy sources
- 4. Hydrogen as an energy carrier
- 5. Electrochemical energy

Basic bibliography:

- 1. W.M. Lewandowski, *Proekologiczne odnawialne źródła energii*, WNT, W-wa 2012
- 2. A. Czerwiński, Ogniwa, akumulatory, baterie, WNT, W-wa 1999.

Additional bibliography:

Result of average student's workload

| Activity | Time (working hours) |
|---|----------------------|
| Preparation for the credit course and credit course | 25 |
| 2. Consultation | 5 |
| 3. Lecture | 30 |
| | |

Student's workload

| Source of workload | hours | ECTS |
|----------------------|-------|------|
| Total workload | 60 | 3 |
| Contact hours | 35 | 3 |
| Practical activities | 0 | |
