

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Foundations

Course

Field of study

Civil Engineering

Area of study (specialization)

-

Level of study

First-cycle studies

Form of study

part-time

Year/Semester

2/4

Profile of study

general academic

Course offered in

Polish

Requirements

compulsory

Number of hours

Lecture

10

Laboratory classes

0

Other (e.g. online)

0

Tutorials

10

Projects/seminars

10

Number of credit points

3

Lecturers

Responsible for the course/lecturer:

dr inż. Adam Duda

Responsible for the course/lecturer:

adam.duda@put.poznan.pl

Prerequisites

Knowledge: the student has basic knowledge in the field of mathematics and physics and the scope of knowledge included in the study program of the 1st and 2nd semester of studies in the field of Construction

Skills: the student is able to obtain information from literature, databases and other properly selected sources; can integrate the obtained information, interpret and evaluate it, as well as draw conclusions, formulate opinions

Social competences: the student is able to work independently and cooperate in a team on the assigned task and is responsible for the reliability of the results of their work and their interpretation Achieving a basic level of knowledge in the field of soil science and soil mechanics appropriate for the 1st degree studies in the field of Construction

Course objective

Achieving a basic level of knowledge in the field of soil science and soil mechanics appropriate for the 1st degree studies in the field of Construction

Course-related learning outcomes

Knowledge

The student knows the basics of geology, has detailed knowledge in the field of soil mechanics and foundations engineering work

The student knows building legislation, Polish standards (PN) and European standards (EN), technical conditions of constructing building facilities, as well as basic ideas and rules in the field of intellectual and industrial property protection

Skills

The student is able to plan and carry out simple laboratory experiments leading to the assessment of the quality of building materials and engineering structures; is able to clearly present and interpret the obtained results and to draw conclusions.

The student is able to obtain information from literature, databases and other properly selected sources; is able to integrate the obtained information, interpret and evaluate it, as well as draw conclusions, formulate opinions and positions and discuss them.

Social competences

The student is responsible for the reliability of the obtained results and their interpretation

The student understands the need for teamwork, is responsible for the safety of his own and the team's work.

The student is ready to critically assess their knowledge and received content, as well as to critically evaluate the results of their own work

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Pass a subject, foundation design project.

Programme content

Introduction to foundations. Division of direct foundations. Load capacity of the subsoil. Dimensioning of direct foundations. Stresses in the soil medium. Deformability of subsoil, foundation settlement. Stability of construction excavations. Drainage of the subsoil.

Teaching methods

1. Lecture - multimedia presentation
2. Design exercises - multimedia presentation, preparation of the direct foundation design

Bibliography

Basic

1. WiFun Z.: Zarys geotechniki, WKiŁ, Warszawa 2012.

2. O. Puła: Projektowanie fundamentów bezpośrednich według Eurokodu 7. Wyd. 2 lub 3, DWE, Wrocław 2014.

3. A. Dąbska, A. Gołębiwska. Podstawy geotechniki: zadania według Eurokodu 7. Oficyna Wydawnicza Politechniki Warszawskiej, Warszawa 2012.

4. S. Garwacka-Piórkowska i I. Cios: Projektowanie typowych fundamentów bezpośrednich i konstrukcji oporowych z uwzględnieniem Eurokodów wraz z przykładami. Oficyna Wydawnicza Politechniki Warszawskiej, Warszawa 2014.

Additional

1. L. Wysokiński, W. Kotlicki i T. Godlewski, Projektowanie geotechniczne według Eurokodu 7. Poradnik. Instytut Techniki Budowlanej, Warszawa 2011.

2. Cz. Rybak i in.: Fundamentowanie. Projektowanie posadowień. DWE, Wrocław 2001.

3. M. Obrycki, S. Pisarczyk: Wybrane zagadnienia z fundamentowania. Przykłady obliczeń. WPW, Warszawa 2005.

Breakdown of average student's workload

	Hours	ECTS
Total workload	75	3,0
Classes requiring direct contact with the teacher	30	1,5
Student's own work (literature studies, preparation for laboratory classes/tutorials, preparation for tests/exam, project preparation) ¹	45	1,5

¹ delete or add other activities as appropriate
