POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Elective subject B: Electrical and electronic systems in industry

Course

Field of study Year/Semester

Electrical Engineering 4/8

Area of study (specialization) Profile of study

Electromobility and electrical systems in vehicles and industry general academic

Level of study Course
First-cycle studies polish

Form of study Requirements

part-time elective

Number of hours

Lecture Laboratory classes Other (e.g. online)

20 20

Tutorials Projects/seminars

Number of credit points

3

Lecturers

Responsible for the course/lecturer:

Responsible for the course/lecturer:

Course offered in

dr inż. Jerzy Frąckowiak

jerzy.frackowiak@put.poznan.pl

tel. 616652693

Wydział Automatyki, Robotyki i Elektrotechniki

ul. Piotrowo 3A, 60-965 Poznań

Prerequisites

Knowledge of Boolean algebra, minimization of logic functions, basics of microcontrollers and programming

Course objective

Synthesis of selected industrial control systems, development of algorithms and control programs for PLC controllers, their activation and testing.

Course-related learning outcomes

Knowledge

Architecture, instruction list, timers, counters, S7-1200 PLC interrupts, selected PLC programming languages

POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

Skills

Is able to formulate a control algorithm for combinational systems and the SFC method, uses programming languages and appropriate IT tools used in electrical engineering

Social competences

Is aware of the importance of own work and compliance with professional ethics, is ready to comply with the principles of team work and take responsibility for jointly performed tasks

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Lecture - 90 minutes final test

Laboratory - development of the control algorithm; writing, launching and presenting the control program of an example control system

Programme content

PLC programmable controllers: their architecture, interrupts, timers, fast counters, PTO and PWM generators, instruction list; PLC programming languages; synthesis of control systems in the traditional and SFC approach, control algorithms of sample industrial systems, their SFC diagrams and control programs.

Teaching methods

Lecture: multimedia presentation illustrated with examples given on a blackboard

Laboratory exercises: multimedia presentation, presentation illustrated with examples given on a blackboard, and performance of tasks given by the teacher - practical exercises.

Bibliography

Basic

Seta Z., Wprowadzenie do zagadnień sterowania, Wydawnictwo Mikom, Warszawa 2002.

Kamiński K., Programowanie w Step 7 Microwin, GRYF, Warszawa 2006.

Dokumentacja sterownika S7-1200 firmy Siemens.

Additional

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

Breakdown of average student's workload

| | Hours | ECTS |
|---|-------|------|
| Total workload | 70 | 3,0 |
| Classes requiring direct contact with the teacher | 50 | 2,0 |
| Student's own work (literature studies, preparation for | 20 | 1,0 |
| laboratory classes/tutorials, preparation for tests/exam, project preparation) ¹ | | |
| preparation) * | | |
