POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS) pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

COURSE DESCRIPTION CARD - SYLLABUS

Course name Occupational diseases

Course

Field of study Safety Engineering Area of study (specialization) Safety and Crisis Management Level of study Second-cycle studies Form of study part-time Year/Semester 1/2 Profile of study general academic Course offered in Polish Requirements elective

Number of hours

LectureLaborate100TutorialsProjects100Number of credit points3

Laboratory classes 0 Projects/seminars 0 Other (e.g. online) 0

Lecturers

Responsible for the course/lecturer: dr hab. Joanna Sadłowska-Wrzesińska

Instytut Inżynierii Bezpieczeństwa

Zakład Zarzadzania Ryzykiem i Jakoscią

email: joanna.sadlowskawrzesinska@put.poznan.pl Responsible for the course/lecturer: dr inż. Żaneta Nejman

email: zaneta.nejman@gmail.com

Prerequisites

The student has basic knowledge of ergonomics and occupational safety, is able to interpret the relationships in the human-technical object system, and organize work taking into account the reduction

POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS) pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

of physical and mental loads for the human body. In addition, the student is aware of the social role of a technical university graduate and understands the legitimacy of health protection at work.

Course objective

To acquaint the Student with theoretical and practical problems related to the impact of work on human health, which in turn should enable the acquisition of the ability to control the degree of harmfulness of working conditions and strive to minimize it in all situations related to work.

Course-related learning outcomes

Knowledge

- The student knows issues in the field of ergonomics and occupational safety, in connection with the issues of occupational health P7S_WG_03

- The student knows the issues of the costs of occupational diseases and work-related illnesses and understands the functioning of insurance systems P7S_WG_04

Skills

- The student is able to correctly select the sources and information derived from them, using them to analyze and evaluate data on the health of working populations, formulate conclusions based on these data and propose remedial actions in relation to the risk of occupational diseases P7S_UW_01

- Student is able to use research, analytical, simulation and experimental methods to formulate and solve organizational problems in the field of health security. P7S_UW_04

- The student is able to make a critical analysis of the organization's functioning in the context of its security policy and assess - in conjunction with Security Engineering - the existing organizational and technical solutions, proposing corrective actions to improve the level of health safety P7S_UW_06

- Student is able to identify changes in requirements, standards, regulations, technical progress and the reality of the labor market, and based on them determine the needs to supplement own knowledge and others in the field of occupational diseases P7S_UU_01

Social competences

- The student is aware of the recognition of cause and effect relationships in the implementation of the set goals and organizational tasks, including health security of employees P7S_KK_01

- The student is aware of the recognition of the importance of knowledge in solving problems in the field of safety engineering and continuous improvement in topics related to occupational diseases P7S_KK_02

- The student is able to initiate activities related to the formulation and transfer of information on the risk of occupational diseases and work-related diseases P7S_KO_02

- The student is aware of the responsibility for own work and readiness to comply with the principles of teamwork and taking responsibility for jointly implemented tasks focused on the prevention of occupational diseases P7S_KR_02

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS) pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

forming assessment:

- knowledge is verified by short tests after the third and fifth didactic unit - short test and problem tasks;

- social skills and competences are verified by issuing partial grades resulting from: teamwork; rewarding activity; independent problem solving.

Summative rating:

knowledge is verified by an oral exam on basic concepts related to human functioning in the work environment, including occupational health problems, methodology for diagnosing these problems and legal classification of occupational disease;

classes - average partial grades + grade from the preventive action plan prepared by students in the workplace.

Programme content

1. Health - a historical outline, evolution of the concept, modern approaches (biomedical, holistic, A. Antonovsky's salutogenesis model, homeostasis vs. homeodynamics). Health determinants according to Marc Lalonde. 2. Basics of the physiology of the human body. Selected issues of biomechanics and anthropometry. 3. Occupational disease as a medical and legal concept. Impact of harmful and arduous factors in the work environment. Hazard analysis at the workplace. Occupational disease - the process of recognition and adjudication. 4. Occupational diseases resulting from the effects of factors harmful to the work environment. Review, incidence distribution, change trends. 5. Occupational diseases caused by the way the work is performed. Ergonomic risk factors. Work related illnesses. 6. Pathologies of the workplace. 7. Health prevention. Popularization of the concept of health promotion in the workplace. Shaping a health safety culture.

Teaching methods

lecture

- informative lecture, conversational lecture,

exercises

- displaying methods (film, show), seminar discussion, case study, brainstorming, workshop method.

Bibliography

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS) pl. M. Skłodowskiej-Curie 5, 60-965 Poznań
