

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Introduction to Technology

Course

Field of study

Safety Engineering

Area of study (specialization)

Level of study

First-cycle studies

Form of study

part-time

Year/Semester

1/1

Profile of study

general academic

Course offered in

Polish

Requirements

compulsory

Number of hours

Lecture

12

Laboratory classes

0

Other (e.g. online)

0

Tutorials

10

Projects/seminars

0

Number of credit points

5

Lecturers

Responsible for the course/lecturer:

prof. dr hab. inż. Edwin Tytyk

email: edwin.tytyk@put.poznan.pl

tel. (61) 665-33-77 (Secretary -74)

Faculty of Engineering Management

ul. J. Rychlewskiego 2, pok. 360

60-965 Poznań

Responsible for the course/lecturer:

dr Katarzyna Szwedzka

email: katarzyna.szwedzka@put.poznan.pl

tel. (61) 665-33-74 (Secretary)

Faculty of Engineering Management

ul. J. Rychlewskiego 2, pok. 369

60-965 Poznań

Prerequisites

Knowledge of mathematics and physics in high school. Ability to solve simple problems in mathematics and physics. Group work, interest in technology.

Course objective

To familiarize students with the basic problems associated with the development of technology, make aware of the logic of changes in manufacturing techniques and human relationships with technology and the environment. The systemic nature of these compounds is emphasized. Familiarizing students with modern trends in the development of technology and technology as well as the organization of human work aims to develop practical skills in identifying, understanding and describing contemporary techniques and technologies used in industry and services.

Course-related learning outcomes

Knowledge

Student:

- 1- knows issues in the field of technical safety, security systems, health and safety as well as threats and their effects
- 2- knows the issues of the life cycle of products, devices, facilities, systems and technical systems
- 3- knows the issues of quality engineering in relation to products and processes knows the issues of management and organization as well as marketing and logistics in the context of security engineering
- 4- knows the basic methods, techniques, tools and materials used in preparation for conducting scientific research and solving simple engineering tasks using information technology, information protection and computer support..

Skills

Student:

- 1- can properly choose the sources and information derived from them, make an assessment, critical analysis and synthesis of this information
- 2- can see in engineering tasks systemic and non-technical as well as socio-technical, organizational and economic aspects
- 3- can use analytical, simulation and experimental methods for formulation and solving engineering tasks, also using information and communication methods and tools
- 4- can critically analyze the functioning and evaluate - in conjunction with Safety Engineering - existing technical solutions, in particular machinery, equipment, facilities, systems, processes and services
- 5- can design an object, system or process that meets the requirements of safety engineering using the appropriate methods and techniques
- 6- can identify changes in requirements, standards, regulations and technical progress as well as the reality of the labor market and based on them determine the needs of supplementing knowledge.

Social competences

Student:

- 1- is aware of the recognition of the importance of knowledge in solving problems in the field of security engineering and continuous improvement
- 2- is aware of the understanding of non-technical aspects and effects of engineering activities, including its impact on the environment and the associated responsibility for decisions.

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Formative assessment:

- a) in the scope of exercises: ongoing checking of knowledge and skills during calculation and graphic exercises,
- b) in the scope of lectures: based on a discussion of the material learned in previous lectures; bonus attendance at lectures.

Summative rating:

- a) in the scope of exercises: based on the results of the average partial grades of the forming grade
- b) in the scope of lectures: an exam in the form of a written test.

Programme content

Elements of the history of technology against the backdrop of human evolution and the development of societies. Techniques and technologies regarding materials (among others: plastic forming, casting, machining, heat treatment and thermo-chemical processes). Connections used in machine construction, principles of construction and functioning of machine components (bearings, gears, clutches, brakes). Techniques and technologies related to energy (sources, methods of transmission and transformation). Information techniques and technologies. Techniques and technologies in production, distribution, transport and other logistic processes. Selected problems of modern technical civilization. Ethical problems of the user and the creator of the technique.

Teaching methods

Lectures with multimedia presentation

Accounting and designing exercises on topics related to lectures.

Bibliography

Basic

1. Wprowadzenie do techniki, Edwin Tytyk, Marcin Butlewski, Wyd. Politechniki Poznańskiej, Poznań, 2008
2. Wprowadzenie do techniki - materiały do ćwiczeń i wykładów, Zbigniew Tomaszewski, Wyd. Politechniki Poznańskiej, Poznań, 2002
3. Encyklopedia technik wytwarzania stosowanych w przemyśle maszynowym, Tom I, Jerzy Erbel (red.), Oficyna Wydawnicza Politechniki Warszawskiej, Warszawa, 2001
4. Encyklopedia technik wytwarzania stosowanych w przemyśle maszynowym, Tom II, Jerzy Erbel (red.), Oficyna Wydawnicza Politechniki Warszawskiej, Warszawa, 2001

Additional

1. Technologia maszyn, Stefan Okoniewski, WSiP, Warszawa, 1999
2. Powszechna historia techniki, Bolesław Orłowski, Oficyna Wydawnicza Mówią Wieki, Warszawa, 2010
3. Dawne wynalazki, Peter James, Nick Thorpe, Świat Książki, Warszawa, 1997

Breakdown of average student's workload

	Hours	ECTS
Total workload	77	5,0
Classes requiring direct contact with the teacher	22	2,5
Student's own work (literature studies, preparation for laboratory classes/tutorials, preparation for tests/exam, project preparation) ¹	55	2,5

¹ delete or add other activities as appropriate
