

COURSE DESCRIPTION CARD - SYLLABUS

Course name

National and International Law

Course

Field of study

Safety Engineering

Area of study (specialization)

-

Level of study

First-cycle studies

Form of study

full-time

Year/Semester

2/4

Profile of study

general academic

Course offered in

Polish

Requirements

compulsory

Number of hours

Lecture

15

Tutorials

Laboratory classes

Projects/seminars

Other (e.g. online)

Number of credit points

1

Lecturers

Responsible for the course/lecturer:

dr Paulina Kubera

email: Paulina.Kubera@put.poznan.pl

tel.61-665-33-94

Wydział Inżynierii Zarządzania

ul. J. Rychlewskiego 2, 60-965 Poznań

Responsible for the course/lecturer:

Prerequisites

A student should have a basic knowledge on the functioning of the state and law.

Course objective

To provide students with basic knowledge of the Polish legal system, the European Union legal system, their mutual relations and to bring closer the selected issues of private international law.

Course-related learning outcomes

Knowledge

- basic knowledge on law- making, law interpretation and its application, useful in management and organization as well as marketing and logistics in the context of safety engineering,
- knowledge on sources of national law and their hierarchy, sources of EU law, their mutual relations and the institutional and legal system of the European Union,
- knowledge on selected issues of private international law and arbitration.

Skills

- ability to properly select legal regulations and information derived from them, assess them, conduct a critical analysis and synthesis of obtained information, formulate conclusions and comprehensively justify the adopted solutions,
- ability to apply the law when analyzing and solving problems in domestic and cross-border situations.

Social competences

- recognising the importance of law in solving problems in the field of safety engineering and the need for continuous self- improvement,
- recognising legal aspects and legal implications of engineering activities and related liability for the decisions made.

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Formative assessment: discussions summarizing particular lectures and tutorials, solving legal problems during the classes that offers the opportunity to assess the student's understanding of the issues raised

Summative assessment: knowledge acquired is verified at the colloquium conducted in the last classes. The colloquium has a written form and consists of about 10 questions (mostly test questions + 1-2 open questions), variously scored. Passing threshold: 55% of points.

Programme content

Introduction to jurisprudence. Sources of national law. Characteristics of the European Union legal system. Judicial system in Poland. Elements of civil procedure. Arbitration. Selected issues of private international law.

Teaching methods

Informative, problem-based, conversational lecture using a multimedia presentation.
