

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Production Management in Industry 4.0

Course

Field of study

Inżynieria zarządzania / Engineering Management

Area of study (specialization)

Managing Enterprise of the Future

Level of study

Second-cycle studies

Form of study

full-time

Year/Semester

1/2

Profile of study

general academic

Course offered in

English

Requirements

elective

Number of hours

Lecture

15

Laboratory classes

Other (e.g. online)

Tutorials

Projects/seminars

15

Number of credit points

3

Lecturers

Responsible for the course/lecturer:

Prof. dr hab.inż. Stefan Trzcieliński

Responsible for the course/lecturer:

Dr inż. Edmund Pawłowski

Prerequisites

General knowledge about machine technology, production control and infrastructure of Industry 4.0

The ability to thematic search and selection of literature sources.

Course objective

Preparation of the student to organize and manage production systems in the conditions of automated and robotic processes.

Course-related learning outcomes

Knowledge

Knowledge about: functions covered by operations management, technologies and their role in industry 4.0, the consequences of the way the value stream is organized and controlled, methods of transforming a company into Enterprise 4.0.

Skills

Skills in: assessing the impact of external conditions on operations management, generating ideas to

solve problems related to operations management, choosing methods to support the transformation of the company into Enterprise 4.0.

Social competences

He can work and play various roles in a team.

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Micro-tasks verifying understanding of lecture content.

Development of a team project.

Programme content

Technologies that changed the world. Operations / production management functions. Business context of operations / production management. Key technologies of Industry 4.0. Capital and organizational consequences of value stream flow; circular economy. Methods supporting the digital transformation of manufacturing enterprises.

Teaching methods

Conversational lecture with multimedia presentation.

Team project including elements of digital transformation of company into Enterprise 4.0.

Bibliography

Basic

Denkena, B., Mörke, T. (2017). Cyber-physical and intelligent systems in manufacturing and life cycle: Genetics and intelligence - keys to industry 4.0. Elsevier Inc.
