Course-related learning outcomes

Knowledge

P6S_WG_04 Has knowledge of selected problems of higher mathematics.

P6S_WG_04 Knows the application of higher mathematics to solve technical problems.

Skills

P6S_UW_03 Can use the basic knowledge of higher mathematics as a tool in logistics.

P6S UO 02 Can use mathematical apparatus in studies.

Social competences

P6S KO 02 Understands and uses a formalized mathematical apparatus in management.

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Lectures: passing the semester is based on the grade of the exercises. The exam takes place at the end of the second semester - includes material from both semesters.

Tutorials: knowledge is verified on the basis of a 75-minutes test, which are realized at the end of the semester.

Programme content

Elements of linear algebra:

- matrices and determinants,
- systems of linear equations,
- vectors, scalar and vector product,
- surface and straight line in space.

Functions of one variable:

- graphs of elementary and rational functions,
- function limits,
- inverse functions.

Differential calculus of one-variable functions.

Teaching methods

Lecture: oral presentation with examples and formulas, which are presented using a visualizer.

Tutorials: presentation of sample tasks on the board followed by independent solving of similar examples by students.
