

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Introduction to Technology

Course

Field of study

Logistic

Area of study (specialization)

Level of study

First-cycle studies

Form of study

full-time

Year/Semester

1/1

Profile of study

general academic

Course offered in

Polish

Requirements

compulsory

Number of hours

Lecture

30

Laboratory classes

0

Other (e.g. online)

0

Tutorials

15

Projects/seminars

0

Number of credit points

4

Lecturers

Responsible for the course/lecturer:

prof. dr hab. inż. Edwin Tytyk

email: edwin.tytyk@put.poznan.pl

tel. (61) 665-33-77 (Secretary -74)

Faculty of Engineering Management

ul. J. Rychlewskiego 2, pok. 360

60-965 Poznań

Responsible for the course/lecturer:

dr Katarzyna Szwedzka

email: katarzyna.szwedzka@put.poznan.pl

tel. (61) 665-33-74 (Secretary)

Faculty of Engineering Management

ul. J. Rychlewskiego 2, pok. 369

60-965 Poznań

Prerequisites

Knowledge of mathematics and physics in high school. Ability to solve simple problems in mathematics and physics. Group work, interest in technology.

Course objective

To familiarize students with the basic problems associated with the development of technology, make aware of the logic of changes in manufacturing techniques and human relationships with technology and the environment. The systemic nature of these compounds is emphasized. Familiarizing students with modern trends in the development of technology and technology as well as the organization of human work aims to develop practical skills in identifying, understanding and describing contemporary techniques and technologies used in industry and services.

Course-related learning outcomes

Knowledge

Student:

[P6S_WG_01] - knows the basic issues of construction, technology and techniques related to logistics

[P6S_WG_02] - knows the basic issues of mechanics, construction and operation of machinery related to logistics.

Skills

Student:

[P6S_UW_03] - can apply the right experimental and measurement techniques to solve the problem within the studied subject, including computer simulation within logistics and its specific issues, and supply chain management

[P6S_UW_06] - able to assess and make a critical economic analysis of the selected problem, which falls within the framework of logistics and its specific issues, and supply chain management

[P6S_WG_01] - can identify changes in requirements, standards, regulations, technical progress and the reality of the labor market, and based on them determine the needs of supplementing knowledge.

Social competences

Student:

[P6S_KO_02] - is aware of initiating activities related to the formulation and transfer of information and cooperation in society in the field of logistics.

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Formative assessment:

a) in the scope of exercises: ongoing checking of knowledge and skills during calculation and graphic exercises,

b) in the scope of lectures: based on a discussion of the material learned in previous lectures; bonus attendance at lectures.

Summative rating:

a) in the scope of exercises: based on the results of the average partial grades of the forming grade

b) in the scope of lectures: an exam in the form of a written test.

Programme content

Elements of the history of technology against the backdrop of human evolution and the development of societies. Techniques and technologies regarding materials (among others: plastic forming, casting, machining, heat treatment and thermo-chemical processes). Connections used in machine construction, principles of construction and functioning of machine components (bearings, gears, clutches, brakes). Techniques and technologies related to energy (sources, methods of transmission and transformation). Information techniques and technologies. Techniques and technologies in production, distribution, transport and other logistic processes. Selected problems of modern technical civilization. Ethical problems of the user and the creator of the technique.

Teaching methods

Lectures with multimedia presentation

Accounting and designing exercises on topics related to lectures.

Bibliography

Basic

1. Wprowadzenie do techniki, Edwin Tytyk, Marcin Butlewski, Wyd. Politechniki Poznańskiej, Poznań, 2008
2. Wprowadzenie do techniki - materiały do ćwiczeń i wykładów, Zbigniew Tomaszewski, Wyd. Politechniki Poznańskiej, Poznań, 2002
3. Encyklopedia technik wytwarzania stosowanych w przemyśle maszynowym, Tom I, Jerzy Erbel (red.), Oficyna Wydawnicza Politechniki Warszawskiej, Warszawa, 2001
4. Encyklopedia technik wytwarzania stosowanych w przemyśle maszynowym, Tom II, Jerzy Erbel (red.), Oficyna Wydawnicza Politechniki Warszawskiej, Warszawa, 2001

Additional

1. Technologia maszyn, Stefan Okoniewski, WSiP, Warszawa, 1999
2. Powszechna historia techniki, Bolesław Orłowski, Oficyna Wydawnicza Mówią Wieki, Warszawa, 2010
3. Dawne wynalazki, Peter James, Nick Thorpe, Świat Książki, Warszawa, 1997

Breakdown of average student's workload

	Hours	ECTS
Total workload	100	4,0
Classes requiring direct contact with the teacher	45	2,0
Student's own work (literature studies, preparation for laboratory classes/tutorials, preparation for tests/exam, project preparation) ¹	55	2,0

¹ delete or add other activities as appropriate
