

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Transition thesis

Course

Field of study

Aerospace Engineering

Area of study (specialization)

Aeronautical Engineering

Level of study

Second-cycle studies

Form of study

full-time

Year/Semester

2 / 2

Profile of study

general academic

Course offered in

Polish

Requirements

compulsory

Number of hours

Lecture

Laboratory classes

Other (e.g. online)

Tutorials

Projects/seminars

15

Number of credit points

5

Lecturers

Responsible for the course/lecturer:

prof. dr hab. inż. Andrzej Frąckowiak

Responsible for the course/lecturer:

Email : andrzej.frackowiak@put.poznan.pl

tel.

Wydział Inżynierii Lądowej Transportu

ul. Piotrowo 3 60-965 Poznań

Prerequisites

Student has required knowledge, necessary for understanding of profile subjects and specialist knowledge about construction, methods of construction, manufacturing, exploitation, air traffic management, security systems, impact on the economy, society and environment of the aviation and cosmonautics for selected specialties: 1. Aeronautical Engineering.

Student has the ability to self-study using modern teaching tools, such as remote lectures, websites and databases, didactic programs, e-books. Student can obtain information from literature, the Internet, databases and other sources. Can integrate the information obtained and interpret conclusions and create and justify opinions

Student understands the need to learn throughout life; he can inspire and organize the learning process of other people

Course objective

To prepare a master's degree project finalized with a degree thesis presentation

Course-related learning outcomes

Knowledge

Student has extensive knowledge, necessary for understanding of profile subjects and specialist knowledge about construction, methods of construction, manufacturing, exploitation, air traffic management, security systems, impact on the economy, society and environment of the aviation and cosmonautics for selected specialties: Aeronautical Engineering

Skills

Student is able to communicate using various techniques in a professional environment and other environments using a formal record of construction, technical drawing, concepts and definition of the scope of the studied field of study. Student has the ability to self-study using modern teaching tools, such as remote lectures, websites and databases, didactic programs, e-books. Student can obtain information from literature, the Internet, databases and other sources. Can integrate the information obtained and interpret conclusions and create and justify opinions

Social competences

Student understands the need to learn throughout life; he can inspire and organize the learning process of other people. Student is ready to critically evaluate the knowledge and content received, recognize the importance of knowledge in solving cognitive and practical problems and consult experts in the case of difficulties in solving the problem. Student is aware of the social role of a technical university graduate, and especially understands the need to formulate and communicate to the public, in particular through mass media, information and opinions on the achievements of technology and other aspects of engineering activities; he makes efforts to provide such information and opinions in a generally understandable way

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Project assessment (P)

Programme content

Teaching methods

Bibliography

Basic

- Literature adequate to subject of thesis

Additional

- Literature adequate to subject of thesis

Breakdown of average student's workload

	Hours	ECTS
Total workload	126	5,0
Classes requiring direct contact with the teacher	31	1,2
Student's own work (literature studies, preparation for laboratory classes/tutorials, preparation for tests/exam, project preparation) ¹	126	5,0

¹ delete or add other activities as appropriate
