

## COURSE DESCRIPTION CARD - SYLLABUS

Course name

Aircraft general knowledge

### Course

Field of study

Aviation and astronautics

Area of study (specialization)

Level of study

First-cycle studies

Form of study

full-time

Year/Semester

1/1

Profile of study

general academic

Course offered in

polish

Requirements

compulsory

### Number of hours

Lecture

15

Laboratory classes

Other (e.g. online)

Tutorials

Projects/seminars

### Number of credit points

2

### Lecturers

Responsible for the course/lecturer:

mgr Wojciech Muszyński

Responsible for the course/lecturer:

Wydział Inżynierii Środowiska i Energetyki

email: wojciech.muszynski@aeroklub.poznan.pl

tel. +48 500 132 705

### Prerequisites

The student starting this subject should have basic knowledge of airframe assemblies, control systems, hydraulic, pneumatic, fuel, air-conditioning and emergency systems. He should also have the ability to apply the scientific method in solving problems and be ready to cooperate within a team.

### Course objective

To acquaint the student with the construction of the aircraft, its executive teams.

### Course-related learning outcomes

Knowledge

1. has detailed knowledge related to selected issues in the field of manned and unmanned aircraft construction, including on-board equipment and their main components

2. has expanded knowledge necessary to understand profile subjects and specialist knowledge about construction, methods of construction, manufacture, operation, air traffic management, security systems, impact on the economy, society and the environment in the field of aviation and space science for selected specialties:

1. Piloting of aircraft
2. Aero engines and airframe components
3. Aviation security and management
4. Air transport

#### Skills

1. is able to analyze objects and technical solutions, can search in the catalogs and on the manufacturers' websites ready components of machines and devices, including transport and storage devices and equipment, assess their suitability for use in own technical and organizational projects
2. can draw a diagram and a simple machine element in accordance with the principles of technical drawing
3. is able to develop a manual and repair instructions for a simple machine or its components from the group of machines covered by the selected specialty

#### Social competences

1. understands the need for lifelong learning; can inspire and organize the learning process of others
2. is aware of the social role of a technical university graduate, and in particular understands the need for formulation and transmission to the public, in particular through the mass media, information and opinions on the achievements of technology and other aspects of engineering activities; endeavors to provide such information and opinions in a generally understandable way

#### Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Lecture:

- assessment of knowledge and skills demonstrated on the written test - 1.5 hour

#### Programme content

Lecture:

System design, loads, stresses, maintenance, fatigue and corrosion. Attachment methods and detecting the development of faulty attachments. Materials, structural components, loads, stresses and aeroelastic vibrations (flutter). Flight controls, system components, design, operation, indications and warnings, degraded modes of operation, jamming. Fly-by-wire (FBW) control systems. Electrics: general, definitions, basic applications: circuit breakers, logic circuits.

## Teaching methods

1. Lecture: multimedia presentation, illustrated with examples given on the board.

## Bibliography

### Basic

1. Cichosz E., Konstrukcja i praca płatowca, WAT, Warszawa 1986 r.
2. Olejnik A., Budowa statków powietrznych, WAT 1984 r.
3. Błaszczak J., Konstrukcja samolotów, cz.I., Obciążenia zewnętrzne, WAT, Warszawa 1984 r.
4. Danilecki S., Projektowanie samolotów, Oficyna Wydawnicza Politechniki Warszawskiej, Warszawa 2000 r.
5. Polak Z., Rypulak A., Bilski J., Awionika, przyrządy i systemy pokładowe, WSOSP, Dęblin 1999 r.
6. Spitzer Cary R., The Avionics Handbook, AvioniCon Inc, Williamsburg 2001 r.
7. Kazana J., Lipski J., Budowa i eksploatacja pokładowych przyrządów lotniczych, WKiŁ, Warszawa 1983 r.

### Additional

## Breakdown of average student's workload

	Hours	ECTS
Total workload	74	2,0
Classes requiring direct contact with the teacher	32	0,8
Student's own work (literature studies, preparation for written tests ) <sup>1</sup>	42	1,2

<sup>1</sup> delete or add other activities as appropriate
