

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS) pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

# **COURSE DESCRIPTION CARD - SYLLABUS**

Course name				
Elements of measurement theo	ory and environmen	tal protectior	1	
Course				
Field of study			Year/Semester	
Aviation and Astronautics			3/6	
Area of study (specialization)			Profile of study	
			general academic	
Level of study			Course offered in	
First-cycle studies			polish	
Form of study			Requirements	
full-time			elective	
Number of hours				
Lecture	Laboratory cl	asses	Other (e.g. online)	
45	45			
Tutorials	Projects/seminars			
15				
Number of credit points				
7				
Lecturers				
Responsible for the course/lecturer:		Respon	Responsible for the course/lecturer:

tel. 616652218		tel. 61 6	tel. 61 6652655	
Wydział Inżynierii Środowiska i Energetyki			Wydział Inżynierii Lądowej i Transportu	
ul. Piotrowo 3 60-965 Poznań		ul. Piotr	ul. Piotrowo 3 60-965 Poznań	

## Prerequisites

A student starting this subject should have basic knowledge of chemistry, physics, mathematics, natural sciences and knowledge about transport impact on the surrounding environment. I addition student should be able to solve simple problems using publicly available databases such as scientific articles, legal acts or the Internet.

Has basic knowledge of physics, mechanics and strength of materials.

## **Course objective**

To acquaint students with the knowledge about basics of environmental protection in aviation industry and related industries using fuel combustion processes.

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS) pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

Understanding the methods of measuring mechanical quantities.

#### **Course-related learning outcomes**

#### Knowledge

1. has basic knowledge in the scope of the main departments of technical mechanics: statics of kinematics and material point dynamics as well as rigid body and strength of materials, including the basics of the theory of elasticity and plasticity, strain hypotheses, methods of calculating beams, membranes, shafts, joints and other simple structural elements, as well as methods for testing the strength of materials and the state of deformation and stress in structures

2. has basic knowledge in the field of metrology, knows: measurement methods, characteristics of measuring instruments and their classification by purpose, principles of operation and metrological features, workshop metrology, sensors and measuring transducers, registration of results, measurement systems, measurement errors - the influence of external factors, statistical analysis of measurement results, principles of organization of active and passive experiment

3. has detailed knowledge related to selected issues in the field of the most important phenomena occurring in the Earth's atmosphere, the possibility of their prediction, recognition, research, as well as limiting the negative impact of human activities on the surrounding environment

#### Skills

1. is able to communicate using various techniques in a professional environment and other environments using the formal record of construction, technical drawing, concepts and definitions of the scope of the studied field of study

2. is able to prepare and present a short verbal and multimedia presentation devoted to the results of an engineering task

3. is able to analyze objects and technical solutions, can search in the catalogs and on the manufacturers' websites ready components of machines and devices, including transport and storage equipment and devices, assess their suitability for use in own technical and organizational projects

4. is able to develop a safety instruction for a simple and medium complex on-board device, machine or technical flying object in specified environmental conditions

## Social competences

1. understands the need for lifelong learning; can inspire and organize the learning process of others

2. is aware of the importance and understands the non-technical aspects and effects of engineering activities, including its impact on the environment, and the associated responsibility for the decisions taken

3. can think and act in an entrepreneurial manner

4. is aware of the social role of a technical university graduate, and in particular understands the need for formulation and communication to the public, in particular through the mass media, information and

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS) pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

opinions on the achievements of technology and other aspects of engineering activities; endeavors to provide such information and opinions in a generally understandable way

#### Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Lecture: the written examination, test 5-10 questions, 90 min, minimum for positive marsk is 50%

Laboratory - final test and rewarding knowledge necessary for the accomplishment of the problems in the area of the subject, evaluation of student report,

## **Programme content**

Introduction to fuel combustion processes, methods of reducing fuel consumption in aviation, analysis of the formation of toxic compounds during the combustion of fossil fuels used in aviation, carbon dioxide balance in the atmosphere, photovoltaic smog, alternative fuels, noise and prevention methods, EU energy policy and environmental protection, international protocols related to environmental protrection

Scientific knowledge. Methodology of empirical research. Tests of machines and devices at the stages of construction, manufacture and operation. Metrological concepts: size, property, property, value. Measurement; definitions, unit systems. General principles of measuring methods of mechanical quantities. Measurement of stress, force, torque and rotational speed. Construction of the measuring system. Measurement system: sensor, transducer, meter, recorder. Computer software for conducting: analysis of recording and archiving measurements. Analysis of errors, preparation of results and formulation of conclusions from measurements.

## **Teaching methods**

Lecture: multimedia presentation, illustrated with examples on the board

Laboratory exercises: practical exercises carried out in research test rig

#### **Bibliography**

Basic

- 1. Józef Jarosiński: Techniki czystego spalania
- 2. Jerzy Merkisz, Ireneusz. Pielecha: Alternatywne paliwa i układy napędowe
- 3. Molenda J. Steczko K. Ochrona środowiska w gazownictwie i użytkowaniu gazu
- 4. Warych Jerzy: Oczyszczanie przemysłowych gazów odlotowych
- 5. Hagel R., Zakrzewski J.: Miernictwo dynamiczne, WNT Warszawa 1984
- 6. Nawrocki W.: Komputerowe systemy pomiarowe, WKŁ Warszawa 2002

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS) pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

- Additional
- 1. John C. Mycock: Handbook of air pollution control engineering and technology
- 2. PEP2040 Energy Policy of Poland to 2040
- 3. EU and domestic acts and standards for environmental protection in transportation and energy
- 4. Piotrowski J.: Podstawy miernictwa, WNT Warszawa 2002

#### Breakdown of average student's workload

	Hours	ECTS
Total workload	210	7,0
Classes requiring direct contact with the teacher	105	3,5
Student's own work (literature studies, preparation for laboratory	105	3,5
classes, consolidation of the content of classes, preparation for tests,) <sup>1</sup>		

<sup>&</sup>lt;sup>1</sup> delete or add other activities as appropriate
