POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS) pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

COURSE DESCRIPTION CARD - SYLLABUS

Course name			
Heating and cooling device	ces		
Course			
Field of study		Year/Semester	
Transport		1/2	
Area of study (specialization)		Profile of study	
Road transport		general academic	
Level of study		Course offered in	
Second-cycle studies		Polish	
Form of study		Requirements	
part-time		elective	
Number of hours			
Lecture	Laboratory classes	Other (e.g. online)	
18	0		
Tutorials	Projects/seminars		
9	0		
Number of credit points			
4			
Lecturers			
Responsible for the course/lecturer:		sponsible for the course/lecturer:	
dr hab. inż. Krzysztof Bień	iczak prof.PP		
e-mail:krzysztof.bienczak	@put.poznan.pl		
tel. 616655888			
Faculty of Civil and Trans	port Engineering		
Prerequisites			
KNOWLEDGE:			
Student has a general kno	owledge of the impact of technica	I facilities and technologies on the	

environment

SKILLS:

Student is able to define the threats to the environment that constitute a specific technological process implemented in the area of production and operation of food machines and refrigeration devices and to indicate ways of counteracting these threats.

SOCIAL COMPETENCES:

Work in the interdisciplinary team. Ability to lead a team and expand team knowledge.

POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS) pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

Course objective

Overview of the transport rules for products requiring controlled temperatures.

Course-related learning outcomes

Knowledge

Has ordered and theoretically founded general knowledge related to key issues in the field of transport engineering. Has advanced detailed knowledge of selected issues in the field of transport engineering.

Skills

Is able to obtain information from literature, databases and other sources (in Polish and English), integrate them, interpret and critically evaluate them, draw conclusions and formulate and exhaustively justify opinions. Is able to make a critical analysis of existing technical solutions and propose their improvements.

Social competences

Student understands that in the field of transport engineering, knowledge and skills very quickly become obsolete.

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

The knowledge acquired during the lecture is verified on the basis of a written exam in the form of test. The skills acquired during the exercises are verified on the basis of a final test in the form of a written test.

Programme content

Transport of food and dangerous poducts at controlled temperatures. Classification of vehicles for transport under controlled temperatures. Devices that ensure the cryptoclimate in the cargo space. Rules for the operation of devices responsible for the parameters of the cryptoclimate.

Teaching methods

Information and problematic lecture with a multimedia presentation. Exercises - solving problems.

Bibliography

Basic

1. Zwierzycki W., Bieńczak K., Pojazdy chłodnicze w transporcie żywności , Syntherm Poznań 2006

2. Kwaśniowski S., Pojazdy izotermiczne i chłodnicze, Navigator Wrocław 1997

Additional

1. B. Guziński, Chłodnictwo dla praktyków, Systherm Serwis, Poznań 2013
