Institute of Internal Combustion Engines and Drives

ul. Piotrowo 3; 60-965 Poznań

### Prerequisites

Knowledge: Basic knowledge of the design, technology and operation of machines.

Skills: Logical thinking, using information obtained from the library and the Internet

Social competences: Understands the needs of learning and acquiring new knowledge

### Course objective

Acquainting with methods of restoring the fitness of machines

## Course-related learning outcomes

### Knowledge

The student has advanced detailed knowledge of selected issues in the field of transport engineering

The student has advanced and detailed knowledge of the processes occurring in the life cycle of transport systems

### Skills

The student is able to correctly use the selected method of estimating the labor consumption of manufacturing technical objects

The student is able to make a critical analysis of existing technical solutions and propose their improvements (improvements)

The student is able to assess the usefulness of methods and tools for solving an engineering task consisting in the construction or evaluation of the transport system or its components, including the limitations of these methods and tools

### Social competences

The student understands the importance of using the latest knowledge in the field of transport engineering in solving research and practical problems

## Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Written test of the lecture and completion of the project

## Programme content

Methods of mating and regeneration of machine parts, machining to repair dimensions, methods: cold and hot plastic deformation, welding, resistance and friction welding, galvanic and chemical methods. The use of plastics in machine repair, bonding and sealing, including the use of anaerobic-contact adhesives. Application conditions and selection criteria of the regeneration method. Controlling the durability of machines in repair processes.

## Teaching methods

1. Lecture with multimedia presentation
2. Exercise method (subject exercises, practice exercises) - in the form of auditorium exercises
