

## COURSE DESCRIPTION CARD - SYLLABUS

Course name

Project Management 2

### Course

Field of study

Logistics

Area of study (specialization)

Corporate Logistics

Level of study

Second-cycle studies

Form of study

part-time

Year/Semester

1/1

Profile of study

general academic

Course offered in

Polish

Requirements

compulsory

### Number of hours

Lecture

12

Laboratory classes

16

Other (e.g. online)

Tutorials

Projects/seminars

### Number of credit points

3

### Lecturers

Responsible for the course/lecturer:

PhD DSc Eng Magdalena Wyrwicka, PUT Prof.

Responsible for the course/lecturer:

e-mail: [magdalena.wyrwicka@put.poznan.pl](mailto:magdalena.wyrwicka@put.poznan.pl)

Faculty of Engineering Management

Jacka Rychlewskiego St. 2, 60-965 Poznań

### Prerequisites

Student knows as issues in the field of production engineering and its connections with the field of logistics as extended issues in the scope of management characteristic for logistics and supply chain management. Student should collect on the basis of the literature of the subject and other sources (in Polish and English) and in an orderly manner, provide information on the problem within the framework of logistics and its specific issues and supply chain management.

### Course objective

Understanding of project management. Ability to organise project team. Solving problems with project management methodology. Preparation to the project-leader role.

### Course-related learning outcomes

#### Knowledge

1. Detailed methods, tools and techniques characteristic for project management on the course of logistics [P7S\_WG\_08].
2. Best practices of project management within logistics and its specific issues [P7S\_WK\_04].

#### Skills

1. Communicate using appropriately selected resources in a professional environment and in other environments as part of logistics and its specific issues as well as supply chain management [P7S\_UK\_01].
2. Design, using appropriate methods and techniques, the object, system or logistic process and the process associated with it including defining the path of its implementation and potential threats or limitations in analyzed domain [P7S\_UK\_02].
3. Assess the suitability and the possibility of using new achievements (techniques and technologies) in the field of logistics and functionally related areas [P7S\_UW\_06].
4. Formulate and solve tasks through interdisciplinary integration of knowledge from different fields and disciplines used to design logistics systems [P7S\_UO\_01].

#### Social competences

1. Recognize causal relationships in achieving the set goals and grading the significance of alternative or competitive tasks [P7S\_KK\_01].
2. Responsibility for own work and readiness to comply with the rules of working in a team and taking responsibility for the tasks carried out jointly [P7S\_KO\_02].
3. Inspire and organize the learning process of others in the scope of logistics and supply chain management [P7S\_KR\_02].

### Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

- Result of teamwork presentations
- Test

### Programme content

Project's place and role in management. Substance and kinds of projects. Project's maturity. Project's life cycle. Initiation and definition of projects. Performance assessment and risk analysis. Work breakdown structure (WBS). Planning of projects duration and resources. Budgeting. Controlling. Organization of project team. Institutional forms of project management. Computer software to aid project management. Presentation some praxis examples of projects.

### Teaching methods

lecture, presentations, discussion, case study, team work, exercises

## Bibliography
