# **Course-related learning outcomes**

### Knowledge

As a result of the course, the student ought to acquire field specific vocabulary related to the following issues:

- 1 The states of matter
- 2 Separating and purifying mixtures
- 3 Atoms and molecules, the structure of the atom, electron arrangements in atoms
- 4 The Periodic Table of Elements, properties of atoms in chosen groups
- 5. Trends in groups and across periods
- 6. Naming chemical compounds

and to be able to define and explain associated terms, phenomena and processes.

K W03, K W04, P6S WG

### Skills

As a result of the course, the student is able to:

- give a talk on field specific or popular science topic (in English), and discuss general and field specific issues using an appropriate linguistic and grammatical repertoire,
- express basic mathematical formulas and to interpret data presented on graphs/diagrams,
- formulate a text in English where he/she explains/describes a selected field specific topic.

K U01, K U02, K U04, K U05, P6S UK

### Social competences

As a result of the course, the student is able to communicate effectively in a field specific/professional area, and to give a successful presentation in English.

The student is able to recognize and understand cultural differences in a professional and private conversation, and in a different cultural environment.
