# POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS) pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

# **JRSE DESCRIPTION CARD - SYLLABUS**

Course name		
Cooling automatics		
Course		
Field of study		Year/Semester
Transport		3/6
Area of study (specialization)		Profile of study
		general academic
Level of study		Course offered in
First-cycle studies		polish
Form of study		Requirements
part-time		elective
Number of hours		
Lecture	Laboratory classes	Other (e.g. online)
9	9	0
Tutorials	Projects/seminars	
0	0	
Number of credit points		
1		
Lecturers		
Responsible for the course/lectur	rer: Respons	sible for the course/lecturer:

dr inż. Tomasz Rochatka

Faculty of Civil and Transport Engineering

#### **Prerequisites**

Has basic knowledge of physics, mechanics and strength of materials

#### **Course objective**

Getting to know the elements of automatic coolers

#### **Course-related learning outcomes**

#### Knowledge

The student has an ordered, theoretically founded general knowledge of technology, transport systems and various means of transport

The student has knowledge of important development trends and the most important technical achievements and of other related scientific disciplines, in particular transport engineering

#### Skills

The student is able to take into account in the process of formulating and solving tasks in the field of transport engineering also non-transport aspects, in particular social, legal and economic issues

## POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS) pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

Student is able to make a critical analysis of the functioning of transport systems and other technical solutions and to evaluate these solutions, including: is able to effectively participate in the technical inspection and assess the transport task from the point of view of non-functional requirements, has the ability to systematically conduct functional tests

#### Social competences

The student is aware of the social role of a technical university graduate, in particular, he/she understands the need to formulate and transfer to the society, in an appropriate style, information and opinions on engineering activities, technological achievements, as well as the achievements and traditions of the transport engineer profession

## Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Credit based on the test of knowledge of the lectures and the current control of preparation for laboratory exercises and assessment of their course and reports.

## **Programme content**

Scientific knowledge. Development of automation, concepts related to automation, automatic systems, methods of regulating refrigeration systems, regulation and control of compressors, evaporators and condensers, controllers of cooling systems.

#### **Teaching methods**

- 1. Lecture with multimedia presentation
- 2. Laboratory with taking measurements

## Bibliography

Basic

- 1. Bonca Z. Automatyka chłodnicza i klimatyzacyjna. Wyd. WSM Gdynia 1995.
- 2. Ullirch H.J., Technika chłodnicza poradnik. IPPU MASTA, Gdańsk 1998.

Additional
