

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Basic health and safety training

Course

Field of study

Bioinformatics

Area of study (specialization)

Level of study

Second-cycle studies

Form of study

full-time

Year/Semester

1/1

Profile of study

general academic

Course offered in

English

Requirements

compulsory

Number of hours

Lecture

4

Laboratory classes

Other (e.g. online)

Tutorials

Projects/seminars

Number of credit points

0

Lecturers

Responsible for the course/lecturer:

Beata Mrugalska, PhD, DSc, Eng.

Responsible for the course/lecturer:

Prerequisites

A student should have knowledge about the basic hazards to human health and life, be able to apply the knowledge they have learned throughout the entire study process and be able to take responsible action in an emergency.

Course objective

To familiarize students with safety, hygiene at work and fire protection regulations in force at the Poznan University of Technology.

Course-related learning outcomes

Knowledge

Knows and understands the principles of health and safety and ergonomics.

Skills

Is able to undertake work in an enterprise, individually and as part of a team, and comply with the safety regulations associated with that work.

Social competences

Is ready to take responsibility for assessing the hazards of the research techniques used and for creating safe working conditions.

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Written test where at least one answer is correct (the answer is scored as 0 or 1); the credit is obtained after obtaining at least 60% of the points possible to get.

Programme content

Legal regulations regarding health and safety at work, including:

- a) the rights and obligations of students at the University in the field of occupational health and safety and liability for violation of health and safety rules and regulations,
- b) accidents and diseases,
- c) prevention in the field of student health protection.

Impact of hazardous, harmful and nuisance factors on safety and health. Risk assessment of factors occurring in the processes of learning and working and in the field of methods of protection against threats to the health and life of students.

Problems related to the organization of workplaces, including ergonomics, including workstations with screen monitors and other office equipment.

Procedure in the event of accidents and emergency situations (e.g. fire, breakdown), including first aid in the case of an accident.

Teaching methods

Lecture: multimedia presentation, films
