

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Law for engineers

Course

Field of study

Computing

Area of study (specialization)

Advanced Internet Technologies

Level of study

Second-cycle studies

Form of study

part-time

Year/Semester

2/4

Profile of study

general academic

Course offered in

Polish

Requirements

elective

Number of hours

Lecture

16

Laboratory classes

Other (e.g. online)

Tutorials

12

Projects/seminars

Number of credit points

3

Lecturers

Responsible for the course/lecturer:

dr inż. Rafał Klaus

email: rafal.klaus@put.poznan.pl

tel. 616652574

Instytut Informatyki

ul. Piotrowo 2 60-965 Poznań

Responsible for the course/lecturer:

Prerequisites

Student should have basic knowledge on: legal systems, contemporary computer science applications and problems related to the IT. Student should be able to acquire information from literature, data bases and other sources; student should be able to integrate acquired information, to interpret it, to draw conclusions and to comprehensively formulate and justify judgments

Course objective

Providing students with knowledge on legal issues related to information technology in Poland and European Union. Special emphasis on: privacy, telecommunication law, copyrights management, ecommerce law, electronic signatures.

Course-related learning outcomes

Knowledge

Student has detailed knowledge on:

- domestic and international legal systems,
- law related to: E-commerce, data protection (including personal data), telecommunication, copyrights,

Skills

Student can:

- interpret legal documents, acts, regulations, directives,
- prepare internal regulations, including data security policy, statutes, instructions.

Social competences

Student understands that:

- using IT tools must be law compliant,
- he/she is protected by law (e.g. related to software copyrights),
- it is necessary to update knowledge about legal acts.

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Theoretical knowledge is verified during 45-minute theoretical test performed on last lecture. Test consists of 8 questions. To achieve positive result student should get more than 50% of points. Test topics are provided to students by email at the beginning of the semester. Practical skills are verified during classes (related to particular subjects) and verified during 45-minute practical test performed on last class. Test consists of 8 questions. To achieve positive result student should get more than 50% of points. Test topics are provided to students by email at the beginning of the semester.

Programme content
