Course-related learning outcomes

Knowledge

The student knows the basic issues of mathematics in the study of the structure of economic and logistic phenomena [P6S_WG_04]

Skills

The student is able to apply appropriate computational techniques to solve a problem within mathematics [P6S_UW_03]

The student is able to choose the right tools and methods for solving a problem within mathematics, and to use them effectively [P6S_UO_02]

Social competences

The student is aware of initiating activities related to the formulation and transfer of information and cooperation in the society in the field of mathematics [P6S_KO_02]

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Lecture: Knowledge acquired during the lecture is verified during one test on the last lecture. The final grade consists of a test grade (80%) and a grade for activity during classes (20%). Passing threshold: 50% of the points.

Tutorials: The knowledge acquired during the tutorials is verified during one test at the end of the semester. During the classes, students receive points for activity, 80% of the final grade is the result of the test, and 20% of points for activity. Passing threshold: 50% of the points.

Programme content

Elements of linear algebra:

- matrices and determinants,

- systems of linear equations,

- vectors, scalar and vector product,

- surface and straight line in space.

Functions of one variable:

- graphs of elementary and rational functions,

- function limits,

 - inverse functions.

Differential calculus of one-variable functions.
