Faculty of Engineering of Management

Prerequisites

Knowledge: student has basic knowledge of safety rules

Skills: student has the ability to learn with understanding, use textbooks

Social competences: student is aware of the purpose of learning and acquiring new knowledge in the field of work safety throughout his life

Course objective

The aim of the course is to familiarize the student with the basic: theoretical and practical problems of work safety

Course-related learning outcomes

Knowledge

The student has basic knowledge of managing and running a business and knows the general principles of creating and developing forms of individual entrepreneurship

Skills

The student is able to organize, cooperate and work in a group, assuming various roles in it, and is able to properly define priorities for the implementation of a task set by himself or others

Social competences

The student can think and act in an entrepreneurial way, incl. finding commercial applications for the created system, taking into account not only business benefits, but also social benefits of the conducted activity

The student correctly identifies and solves dilemmas related to the profession of a transport engineer

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Assessment on the basis of a written test. The assessment also takes into account the student's activity during lectures.

Programme content

1. Work safety and its issues, conditions and legal aspects (Labor Code, standards, EU directives).
2. Measures of work safety assessment.
3. Occupational risk in work safety - transport department.
4. Accidents at work. 5. Occupational diseases - the scope of preventive health protection of employees.
6. Techniques and prevention of work safety.
7. Principles of ensuring occupational health and safety.

Teaching methods

Lecture with a multimedia presentation
