

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Object oriented programming

Course

Field of study

Electrical engineering

Area of study (specialization)

Level of study

Second-cycle studies

Form of study

full-time

Year/Semester

1/2

Profile of study

general academic

Course offered in

Polish

Requirements

compulsory

Number of hours

Lecture

0

Laboratory classes

30

Other (e.g. online)

0

Tutorials

0

Projects/seminars

0

Number of credit points

2

Lecturers

Responsible for the course/lecturer:

M.Sc. Damian Burzyński

Responsible for the course/lecturer:

email: damian.burzynski@put.poznan.pl

tel. 61 665 24 49

Institute of Electrical Engineering and
Electronics

ul. Piotrowo 3A, 60-965 Poznań

Prerequisites

A student beginning this course should have basic knowledge of computer science and programming. Additionally, he or she should have abstract thinking skills, be able to acquire information from indicated sources and show readiness to cooperate in a team.

Course objective

To teach students theoretical and practical issues of high-level programming with elements of object-oriented programming, to acquire skills to create applications in Microsoft Visual Studio environment (in C# language). Developing students' skills of solving problems that occur during design and implementation of technical applications.

Course-related learning outcomes

Knowledge

The student knows the principles of high-level programming. The student has knowledge of object-oriented programming, which is useful in creating technical applications.

Skills

The student is able to use tools for programming with the use of object-oriented programming elements. The student is able to program in the C# language.

Social competences

Awareness of the speed of development of information technology and the related need to update knowledge. Is able to independently search for information in literature and Internet, also in foreign languages.

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

The skills acquired during the laboratory classes are verified on the basis of a credit test or on the basis of a project application performed by the student, taking into account the individual activity during the classes. Obtaining additional points for the activity during the classes (especially for: discussing additional aspects of the problem; the effectiveness of applying the knowledge gained in solving the problem; the ability to cooperate as part of a team practicing the specific task in the laboratory; comments related to the improvement of teaching materials; diligence)

Programme content

Implementation in Visual Studio C# Express Edition environment of the issues presented in the lecture in practical object-oriented programs using the following programming elements: declarations of object types, fields and methods, readonly fields, static elements, constructors and destructor, properties, method overloading, operator overloading, encapsulation, inheritance, polymorphism and its use, abstract classes and methods, use of collections of various types, use of delegates and interfaces, programming applications using multiple threads, implementation of selected design patterns.

Teaching methods

Individual work in the computer laboratory, involving the implementation of assigned functions and computer programs, discussion, demonstrations.

Bibliography

Basic

1. Troelsen, Andrew; Japikse, Phlipip. Język C# 6.0 i platforma .NET 4.6. Red. . Warszawa: Wydawnictwo Naukowe PWN, 2017, 1465 s. ISBN 978-83-01-19832-9

2. Stasiak, Andrzej; Dąbrowski, Włodzimierz; Wolski, Michał. Modelowanie systemów informatycznych w języku UML 2.1. Red. . Warszawa: Wydawnictwo Naukowe PWN, 2009, 196 s. ISBN 978-83-01-21108-0

Breakdown of average student's workload

	Hours	ECTS
Total workload	50	2,0
Classes requiring direct contact with the teacher	30	1,5
Student's own work (literature studies, preparation for a final test or preparation of a design application) ¹	20	0,5

¹ delete or add other activities as appropriate
