

POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS) pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

COURSE DESCRIPTION CARD - SYLLABUS

Course name				
Light in architecture and outdoor space				
Course				
Field of study		Year/Semester		
Electrical Engineering	2/3 Profile of study general academic Course offered in Polish Requirements			
Area of study (specialization) Lighting Engineering Level of study				
		Second-cycle studies		
		Form of study		
full-time			elective	
Number of hours				
Lecture	Laboratory classes	Other (e.g. online)		
Tutorials	Projects/seminars			
	15			
Number of credit points				
1				
Lecturers				
Responsible for the course/lecturer: Responsi		ible for the course/lecturer:		
Małgorzata Zalesińska, D. Sc., Er	ng.			
email: Malgorzata.Zalesinska@p	put.poznan.pl			
tel. 616652398				
Faculty of Control, Robotics and Engineering	Electrical			
Piotrowo 3A Street. 60-965 Pozr	nań			

Prerequisites

A student starting this course should have a basic knowledge of lighting engineering. Basic skills in measuring electrical and photometric quantities also in lighting design. The ability to effectively self-study in a field related to the chosen field of study.

Course objective

To provide students with a detailed knowledge of how to illuminate different workplaces and illumination of objects.

POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS) pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

Course-related learning outcomes

Knowledge

1. Has ordered and theoretically founded knowledge in the field of lighting design.

2. Has in-depth knowledge of lighting technology in the field of lighting various objects; knows the processes taking place during the operation of lighting devices.

3. Has extended knowledge of computer-aided design in lighting technology.

Skills

1. Can perform lighting design project and analyze the obtained effects according to physiological, economic and aesthetic criteria.

2. Can design lighting for various objects.

Social competences

1. Recognizes the importance of knowledge in solving cognitive and practical problems, and understands that knowledge and skills quickly become obsolete in lighting engineering and therefore require constant replenishment.

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

The skills acquired during the design exercises are verified on the basis of the lighting design of the facility indicated by the teacher and the discussion of the results obtained. Passing threshold: positive evaluation of the completed project.

Programme content

Analysis of technical, energy, economic and psychophysiological considerations

determining the choice of lighting systems. Economic and energy efficiency

of lighting systems. Evaluation of the illumination of selected architectural objects. Creating

concept of illumination of an architectural object.

Teaching methods

Practical evaluation of illumination of selected objects in Poznań, presentations

multimedia presentations, computer lighting programmes.

3. Żagan W. Iluminacja obiektów. Oficyna Wydawnicza Politechniki Warszawskiej (2003).

4. Żagan W., Krupiński R.: Teoria i praktyka iluminacji obiektów. Oficyna Wydawnicza Politechniki Warszawskiej (2016).

Additional

- 1. Literature available on the website: www.licht.de
- 2. Teaching materials available on the website: http://lumen.iee.put.poznan.pl.
- 3. Lighting Handbook, Reference & Application. IES of North America, New York 2010.

Breakdown of average student's workload

	Hours	ECTS
Total workload	30	1,0
Classes requiring direct contact with the teacher	15	0,5
Student's own work (literature studies, preparation for project classes, project preparation) ¹	15	0,5

¹ delete or add other activities as appropriate
