

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Psychology

Course

Field of study

Electrical Engineering

Area of study (specialization)

Level of study

First-cycle studies

Form of study

full-time

Year/Semester

1/1

Profile of study

general academic

Course offered in

polish

Requirements

elective

Number of hours

Lecture

60

Laboratory classes

Other (e.g. online)

Tutorials

Projects/seminars

Number of credit points

4

Lecturers

Responsible for the course/lecturer:

dr Paulina Siemieniak

Responsible for the course/lecturer:

Wydział Inżynierii Zarządzania

ul J. Rychlewskiego 2

pok. 345

e-mail: paulina.siemieniak@put.poznan.pl

Prerequisites

A student starting this subject should know the basic concepts related to the mechanisms of human behavior, have the ability to perceive, associate and interpret basic phenomena occurring in social relations, be aware of the importance of psychological mechanisms in professional and private life.

Course objective

The aim is to develop the skills of: explaining and predicting social behavior, incl. shaping and leading teams; resisting group influence; persuasion and shaping attitudes; shaping the desired social relations.

Course-related learning outcomes

Knowledge

The student has basic knowledge necessary to understand the social and non-technical determinants of engineering activity [K1_W019]

The student knows and understands the basics of copyright law in relation to the use of psychological tests and questionnaires [K1_W021]

Skills

The student is able to use literature sources available in printed and electronic versions, is able to integrate the obtained information, evaluate and interpret it and draw conclusions as well as formulate and justify opinions, discuss them [K1_U05]

The student is able to make a critical analysis and evaluation [K1_U11]

The student is able to make a comparison of various design solutions and evaluate them in the non-technical scope [K1_U12]

The student is able to notice their systemic and non-technical aspects when formulating and solving tasks concerning electric system systems [K1_U20]

Social competences

The student understands the importance of knowledge in solving problems and improving professional, personal and social competences [K1_K01]

The student is aware of the importance of his own work and is ready to submit to the rules of working in a team and bearing responsibility for the joint implementation of tasks [K1_K03]

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Formative assessment: Questions summarizing particular issues, giving the opportunity to assess the understanding of the issues by the student; written tasks checking the level of mastery of the current material. The points obtained in this way are added to the points from the final test. Summative assessment: Written test on the subject, closed-ended test. Passing- over 50% of correct answers.

Programme content

- 1. Psychology as a science. Genesis, main trends, psychological concepts of man: psychoanalytical, behavioral, humanistic.
- 2. Human nature - personality, temperament, emotional intelligence, brain sex, the theory of cerebral hemispheres specialization, neuropsychological foundations of human behavior
- 3. Distortions in social perception - hidden theories of personality, self-fulfilling prophecy, stereotypes, prejudices, discrimination and prevention; positive discrimination. The phenomenon of the glass ceiling as an example of social barriers.

- 4. Group processes - mechanisms regulating team behavior, team roles, team development stages. Facilitation and social loafing, group thinking syndrome - a threat related to the work of groups and teams. Conclusions from the Zimbardo experiment.
- 5. Social impact. Conformism - informational and normative, obedience to authority. Rules and techniques of social influence according to Cialdini, influence and manipulation, methods of counteracting manipulation. Interpersonal attractiveness - rules. The most famous psychological experiments and conclusions on the mechanisms of human behavior (The Asch-Milgram experiment)
- 6. Conflicts and negotiations - styles and methods of solving conflicts of interest (mediation, arbitration, negotiations, etc.). Selected negotiation techniques (e.g. the principle of competition, the technique of limited competences, the balloon test technique, the prize in paradise technique, the fait accompli politics technique)
- 7. Interpersonal communication - verbal, non-verbal communication, types of argumentation (emotional, rational, one- and two-way), persuasion, styles and tactics of self-presentation (ways of making a "good impression", eg self-promotion). Professional data presentation from the perspective of cognitive processes
- 8. Attitudes and changes in attitudes. Component of attitudes, resisting persuasive messages, justifying behavior - the theory of cognitive dissonance. The theory of reactance

Teaching methods

Problem lecture, lecture with elements of the seminar, presentation illustrated with examples
