Prerequisites

Language competence compatible with level B1+(CEFR). The ability to use vocabulary and grammatical structures required on the high school graduation exam regarding productive and receptive skills, and the vocabulary and concepts introduced during the 2nd and 3rd semester German courses. The ability to work individually and in a group. The ability to use various sources of information and reference works.

Course objective

To advance the student's language competence towards level B2 (CEFR). To help the student achieve the ability to use general and field-specific language effectively, with respect to the following language skills: listening, reading, writing, speaking. To perfect the student's ability to use field-specific texts and to familiarize the student with basic translation techniques. To develop the student's ability to recognize and express cause-effect relationships. To foster the habit of logical thinking (analysis and synthesis of information).

Course-related learning outcomes

Knowledge

The student has acquired field-specific vocabulary related to the following issues: energy generation, power plants, business correspondence.

Skills

The student is able to use English to provide definitions of terms, and explain phenomena and processes referred to in the programme; interpret data presented on graphs/diagrams, interpret source materials; talk on field-specific and general topics, using an appropriate linguistic and grammatical repertoire.

Social competences

The student is able to communicate effectively in the general and field-specific areas, and communicate in German in public.

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Formative assessment: regular assessment of in-class performance and home assignments, quizzes.

Summative assessment: two 60-minute written quizzes featuring a battery of tests. Successful completion of home assignments and a 60% score on the quizzes are required to obtain a pass. Final written and oral exam, level B2 (CERF).

Programme content

General topics: interpretation and description of graphical diagrams. Specialised topics: construction and principle of operation of nuclear, coal, hydroelectric power plants, wind power plants, solar power plants, business correspondence, e-mails.

Teaching methods

Classroom activities guided by the communicative approach.
