

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Organization of trainings and teams management

Course

Field of study

Safety Engineering

Area of study (specialization)

Level of study

First-cycle studies

Form of study

full-time

Year/Semester

4/7

Profile of study

general academic

Course offered in

polish

Requirements

compulsory

Number of hours

Lecture

Laboratory classes

Other (e.g. online)

Tutorials

Projects/seminars

15

Number of credit points

2

Lecturers

Responsible for the course/lecturer:

dr inż. Małgorzata Spychała

email: malgorzata.spychala@put.poznan.pl

Faculty of Engineering Management

2 Prof. Rychlewskiego Str., 60-965 Poznań,

Poland

Responsible for the course/lecturer:

Prerequisites

Knowledge: The student knows the basic concepts related to teamwork.

Skills: The student has the ability to perceive, associate and interpret phenomena occurring while working in a team.

Social competences: The student is aware of the importance of teamwork in professional and private life.

Course objective

The aim is to develop students' team management skills: appointing a team, motivating team members, organizing training, assigning tasks, controlling the work of the team; familiarizing students with the issues of organizing training.

Course-related learning outcomes

Knowledge

1. Student knows the issues of management and organization as well as marketing and logistics in the context of Safety Engineering [K1_W08].
2. Student knows the fundamental dilemmas of modern civilization and development trends as well as the best practices in the field of Safety Engineering [K1_W10].

Skills

1. Student is able to properly select sources and information derived from them, to evaluate, critically analyze and synthesize this information [K1_U01].
2. Student is able to use various techniques in order to communicate in a professional environment and in other environments [K1_U02].
3. Student is able to take part in a debate, to present a problem falling within the scope of Safety Engineering by means of appropriately selected methods [K1_U09].

Social competences

1. Student is able to initiate activities related to the formulation and transfer of information and cooperation in the society in the field of Safety Engineering [K1_K05].
2. Student is aware of professional behavior, adherence to the rules of professional ethics and respect for the diversity of views and cultures [K1_K06].
3. Student is aware of the responsibility for his own work and readiness to submit to the rules of working in a team and to be responsible for jointly performed tasks [K1_K07].

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

- work in groups during each exercise (methods of brainstorming, metaplan) - 30% participation in the final evaluation
- group case study (preparation of training materials) - 30% participation in the final grade
- conducting the training - presentation - 40% participation in the final evaluation

Passing threshold: 50%

≤ 50%; 60% ≥- 3.0,

<60%; 70%> 3.5,

≤70%, 85%> 4.0,

≤85%, 91≥ 4.5,

≤92%, 100% ≥ 5.0.

Programme content

Introduction to the issues of human resource management, stages of managing a team of employees.

Appointment of employee teams - recruitment and selection of team members; Team roles - characteristics of the roles.

Conflicts in the team, strategies of conflict resolution in teams of employees.

Development and improvement of employees in teams. Employee improvement methods.

Training in the organization - training methodology, scope and goals of training in the organization, examples of training programs, characteristics of trainers.

Organizing training in an organization - modern training methods; on-the-job training techniques.

Effectiveness of employee training.

Systems of motivating employees in a team. How to motivate effectively ?- practical tips.

Styles of managing employee teams. Project team management - theory and practice.

Errors in managing employee teams.

Teaching methods

multimedia presentation, case studies, group work, meta-plan, brainstorming

Breakdown of average student's workload

	Hours	ECTS
Total workload	50	2,0
Classes requiring direct contact with the teacher	15	1,0
Student's own work (literature studies, preparation tutorials) ¹	35	1,0

¹ delete or add other activities as appropriate
