

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Diploma seminar

Course

Field of study

Biomedical engineering

Area of study (specialization)

-

Level of study

First-cycle studies

Form of study

full-time

Year/Semester

4/7

Profile of study

general academic

Course offered in

Polish

Requirements

compulsory

Number of hours

Lecture

0

Tutorials

0

Laboratory classes

0

Projects/seminars

45

Other (e.g. online)

0

Number of credit points

4

Lecturers

Responsible for the course/lecturer:

prof. dr hab. Ewa Stachowska

Responsible for the course/lecturer:

dr hab. inż. Jacek Buśkiewicz

Prerequisites

Knowledge transferred in the current educational process in the field of biomedical engineering

Course objective

Preparation for a concise and comprehensible presentation of selected issues related to the implementation of the subject of engineering thesis and examination issues. Paying attention to the need to maintain the correct work structure and linguistic correctness. Preparation for defense and diploma examination.

Course-related learning outcomes

Knowledge

1. Expanded knowledge of biomedical engineering based on various sources of scientific information.
2. The student knows the basic tools for conducting scientific research in the field of biomedical engineering.

Skills

1. The student is able to review literature sources helpful to define particular tasks of an engineering diploma thesis.
2. The student can prepare and present a concise study the selected research topic.

Social competences

He is able to extend his knowledge by independently following scientific reports. Can exchange the acquired information in the research team. Can set priorities for the implementation of a task set by himself or others.

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Lecture : 5-question test at the end of the semester.

Credit for a numerical grade on the basis of the presentation of the paper during the seminar, discussion of the issues presented and answers to the questions asked. Obtaining at least 50% of the points is required.

Programme content

Presentation of fragments of engineering theses and issues of the diploma examination as well as discussions related to their subject. Discussion on obtaining information from literature, databases and other sources in the field of biomedical engineering, the need to respect the intellectual property of individual and team work.

Teaching methods

Multimedia presentation, discussion.

Bibliography

Basic

1. R. Wojciechowska: Przewodnik metodyczny pisania pracy dyplomowej, Wyd. DIFIN, Warszawa 2010
2. E. Opoka: Uwagi o pisaniu i redagowaniu prac dyplomowych na studiach technicznych, Wyd. Politechniki Śląskiej, Gliwice 2001
3. Literature related to the subject of a given engineering thesis

Additional

Breakdown of average student's workload

	Hours	ECTS
Total workload	100	4,0
Classes requiring direct contact with the teacher	45	2,0
Student's own work (literature studies, preparation for laboratory classes/tutorials, preparation for tests/exam, project preparation) ¹	55	2,0

1 delete or add other activities as appropriate
