

## **POZNAN UNIVERSITY OF TECHNOLOGY**

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS) pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

# **COURSE DESCRIPTION CARD - SYLLABUS**

Course name Analytical chemistry and instrumental analysis (analytical and instrumental chemistry in environmental analysis) Course Field of study Year/Semester Chemical and Process Engineering 2/4 Area of study (specialization) Profile of study general academic Level of study Course offered in **First-cycle studies** Polish Form of study Requirements full-time elective Number of hours Lecture Other (e.g. online) Laboratory classes 30 Tutorials **Projects/seminars** Number of credit points 2 **Lecturers** Responsible for the course/lecturer: Responsible for the course/lecturer: dr hab. inż. Agnieszka Zgoła-Grześkowiak, dr hab. inż. Ewa Stanisz, prof. PP e-mail: ewa.stanisz@put.poznan.pl tel. 616652005 e-mail: agnieszka.zgolagrzeskowiak@put.poznan.pl Wydział Technologii Chemicznej tel. 616652033 ul. Berdychowo 4, 60-965 Poznań Wydział Technologii Chemicznej

ul. Berdychowo 4, 60-965 Poznań

#### **Prerequisites**

The student has general knowledge in the field of analytical chemistry and instrumental analysis gained during the classes in analytical and instrumental chemistry. The student uses basic chemical equipment and laboratory glassware.

#### **Course objective**

The aim of this course is to familiarize students with the practical use of basic instrumental techniques and analytical methods used in environmental analysis.

## POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS) pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

### **Course-related learning outcomes**

Knowledge

1. K\_W03 The student distinguishes and is able to assess the possibility of using a given analytical method and / or instrumental technique.

2. K\_W07 The graduate knows the operation principles of the measurement systems. The graduate understands the operation principle of the apparatus used in instrumental techniques.

Skills

1. K\_U08 The graduate can plan and conduct simple experiments, interpret their results and draw conclusions. Selects and applies analytical methods and techniques in qualitative and quantitative analysis. Has the ability to perform quantitative analysis.

2. K\_U05 The graduate has the ability to self-study.

3. K\_U12 The graduate applies WHS (Work Health and Safety ) principles in the analytical laboratory.

#### Social competences

1. K\_K01 The graduate understands the need to develop and improve his/her professional competency.

2. K\_K03 The graduate is aware of the importance of professional conduct and respect for professional ethics.

3. K\_K04 The graduate is aware of the responsibility for his/her own work and the willingness to comply and responsibility for tasks carried out as a team.

#### Methods for verifying learning outcomes and assessment criteria

#### Learning outcomes presented above are verified as follows:

Verbal and written control of the student's knowledge prior to the commencement of laboratory classes (carried out in a stationary or remote mode (e-Kursy platform), depending on the situation). Written reports on the exercises performed.

#### **Programme content**

The laboratory classes include six exercises in the field of environmental analysis (two exercises in volumetric analysis and four in instrumental analysis):

- 1. Iodometric determination of the active chlorine in water.
- 2. Determination of oxygen dissolved in water by the Winkler method.
- 3. Voltammetric determination of lead.
- 4. Spectrophotometry determination of nitrite nitrogen in water.
- 5. Photometric determination of sodium and potassium in environmental samples.
- 6. Determination of bromides in tap water.

# POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS) pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

Before the series of laboratory classes, students are familiarized with the general principles of safety work in the chemical laboratory, during the classes health and safety instructions regarding a given workplace are given.

### **Teaching methods**

Performing experiments in accordance with the schedule of the subject and a written report including the appropriate chemical reactions along with mathematical calculations.

#### **Bibliography**

Basic

1. A. Cygański, Metody spektroskopowe w chemii analitycznej, WNT, Warszawa 1995

2. D.A. Skoog, D.M. West, F.J.Holler, S.R. Crouch, Podstawy chemii analitycznej. Tom 1 i 2, PWN, Warszawa 2006

3. A. Cygański, Podstawy metod elektroanalitycznych, WNT, 1999

4. J. Minczewski, Z. Marczenko, Chemia Analityczna. Tom 1, 2 i 3, PWN, Warszawa 1985

5. A. Cygański, Chemiczne metody analizy ilościowej, WNT, Warszawa 2005

Additional

1. J. Dojlido, J. Zerbe, Instrumentalne metody badania wody i ścieków, Arkady, Warszawa 1997

2. W. Szczepaniak, Metody instrumentalne w analizie chemicznej, PWN, Warszawa 2002

3. H. Elbanowska, J. Zerbe, J. Siepak, Fizyczno – chemiczne badania wód, Wydawnictwo Naukowe UAM, Poznań 1999

#### Breakdown of average student's workload

	Hours	ECTS
Total workload	50	2,0
Classes requiring direct contact with the teacher	30	1,2
Student's own work (literature studies, preparation for laboratory, reports preparation) $^1$	20	0,8

<sup>&</sup>lt;sup>1</sup> delete or add other activities as appropriate
