### Course objective

Mastership of basic principles of image construction of spatial objects on the plane. Training of spatial imagination.

Learning the methods and principles of engineering drawing. Practical skills of preparing the technical documentation. Skills of "reading" the engineering drawing.

### Course-related learning outcomes

Knowledge

1. The student recognizes and explains the construction of parts and assemblies of machine elements on the basis of technical drawings and kinematic diagrams [K\_W05]
2. The student selects the best graphic methods to be used in a given situation when creating drawing documentation, prepares technical drawings [K\_W06]

#### Skills

1. The student has the ability to sketch, read and prepare technical drawing documentation [K\_U01,K\_U02,K\_U05,K\_U17]

#### Social competences

1. The student follows the adopted rules of engineering graphics - [K\_K05]
2. The student is aware of the use of unified drawing rules in order to be understandable within people interested in the transmission of information - [K\_K04]
3. The student is aware of the role played by the graphic form of communication in the process of technical design - [K\_K05]
