

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Surface treatment

Course

Field of study

Materials Engineering

Area of study (specialization)

Level of study

First-cycle studies

Form of study

full-time

Year/Semester

3/5

Profile of study

general academic

Course offered in

polish

Requirements

compulsory

Number of hours

Lecture

15

Laboratory classes

15

Other (e.g. online)

Tutorials

Projects/seminars

Number of credit points

2

Lecturers

Responsible for the course/lecturer:

dr inż. Adam Piasecki

email: adam.piasecki@put.poznan.pl

tel. 61 665 37 77

Faculty of Materials Engineering and Technical

Physics

ul. Piotrowo 3 60-965 Poznań

Responsible for the course/lecturer:

Prerequisites

Basic knowledge of chemistry, physics, materials science. Logical thinking, use of the information obtained from the library and the Internet. Understanding the need for learning and acquiring new knowledge

Course objective

Knowledge of methods and techniques for surface treatment.

Course-related learning outcomes

Knowledge

1. The student should characterize the mechanism of formation, structure and importance of the surface layer of the material for the quality and durability of products - [K_W03, K_W16]
2. The student should characterize the surface treatment methods - [K_W08]

Skills

1. The student is able to choose the method of surface treatment of the product according to technical and economic criteria - [K_U01, K_U05, K_U13]
2. The student is able to examine the properties of the surface layer of the product - [K_U05, K_U08]

Social competences

1. The student is able to work in a group - [K_K03]
2. The student is aware of the importance of surface treatment for the quality and durability of products, economy and society - [K_K02]

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Lecture: - credit on the basis of a test consisting of both open and test questions carried out at the end of the semester.. Scale of estimate: 51-60% - dst(C), 61-70% - dst+(C+), 71-80% - db(B), 81-90% - db+(B+), 91-100% - bdb(A).

Laboratory classes: evaluation of students knowledge necessary to prepare, and carry out the lab tasks and evaluation of reports.

Programme content

Lecture: Characteristics and properties of the surface layer of the material. Classification of methods and techniques of surface treatment. Chemical and electrochemical surface treatment. Galvanic coatings. Hot dip metallization. Diffusion metallization. Sprayed and thermally welded coatings. Paint coatings. Methods of testing surface layers.

Laboratory classes: 1. Hot dip metallized coatings. 2. Diffusion layers. 3. Galvanic coatings. 4. Sprayed and thermally welded coatings. 5. Paint coatings.

Teaching methods

multimedia presentations

Bibliography

Basic

1. Burakowski T., Areologia. Podstawy teoretyczne, Instytut Technologii Eksploatacji – PIB / 2013.
2. Blicharski M., Inżynieria powierzchni, Wyd. PWN, 2009.

Additional

1. Młynarczak A. Jakubowski J.: Obróbka powierzchniowa i powłoki ochronne. Wyd. PP 1998.
2. Praca Zbiorowa. Poradnik Galwanotechnika. WNT Warszawa 2002.

Breakdown of average student's workload

	Hours	ECTS
Total workload	57	2,0
Classes requiring direct contact with the teacher	32	1,0
Student's own work (literature studies, preparation for laboratory classes/tutorials, preparation for tests/exam, project preparation) ¹	25	1,0

¹ delete or add other activities as appropriate
