

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Systems of Wastewater Treatment

Course

Field of study

Environmental Engineering Second-cycle Studies

Area of study (specialization)

Water Supply, Water and Soil Protection

Level of study

Second-cycle studies

Form of study

full-time

Year/Semester

1/2

Profile of study

general academic

Course offered in

polish

Requirements

compulsory

Number of hours

Lecture

30

Laboratory classes

15

Other (e.g. online)

Tutorials

Projects/seminars

30

Number of credit points

6

Lecturers

Responsible for the course/lecturer:

dr hab.inż. Zbysław Dymaczewski, prof.PP

email: zbyslaw.dymaczewski@put.poznan.pl

tel.61 6653662

Faculty of Environmental Engineering and
Energy

ul. Berdychowo 4, 61-131 Poznań

Responsible for the course/lecturer:

Prerequisites

1.Knowledge: Student should have the basic knowledge of water and wastewater technology as well as mathematics, chemistry, fluid mechanics in the range presented on the 1st cycle study.

2.Skills: Student should be able to perform calculations in the field of mathematics, chemistry, fluid mechanics in the range presented on the 1st cycle study and should be able to do calculations for facilities of water and wastewater treatment plants in the range presented on the 1st cycle study.

3.Social competencies:

Ability for continuous self-improvement. Team work.

Course objective

Aim: Enhancement of knowledge and skills in the field of wastewater treatment technology necessary for designing and maintenance of WWTP facilities

Course-related learning outcomes

Knowledge

1. Student knows technological systems of wastewater treatment
2. Student knows methods of designing fundamental processes and technological systems of wastewater treatment and sludge management
3. Student understands the role of experiment in pre-design research
4. Student knows bases of mathematical modelling of activated sludge systems
5. Student knows selected unit processes of wastewater treatment and sludge management

Skills

1. Student can prepare a conception design of a municipal WWTP
2. Student can prepare a conception for sludge management
3. Student can perform a computer simulation of an activated sludge WWTP and give interpretation of the results
4. Student can perform lab experiments and give interpretation of the results

Social competences

1. Student understands the need of a team work in solving theoretical and practical problems
2. Student understands the need of a systematic improvement of his competence

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Lectures:

- checking presence and activity,
- written final exam

Labs:

- written or oral short test at the beginning of each lab.,
- report after each lab.,
- continuous evaluation each lab.,

- final written test.

Designs:

- checking progress of work,
- evaluation of activity and knowledge on consultations,
- final written test
- report of the simulation project and it's defence.

Programme content

Lectures

- Objects of WWTP. Preparing technological scheme of WWTP.
- Factors affecting the choice of treatment method. Determination of influent flow and characteristics. Laboratory analyses and modelling for the needs of WWTP designing.
- Technological schemes of WWTPs.
- Systems for nutrients removal. Effectiveness of different WWTP systems.
- Systems for supernatant treatment.
- Systems for sludge management.
- Systems for odours removal.
- Computer simulation of WWTP: Activated Sludge Models ASM 1, 2, 2d, 3, optimisation of activated sludge, wastewater treatment process using computer simulation.

Designs

- Technological conception for municipal WWTP.
- Calculation of hydraulic loss for selected units of WWTP.
- Computer simulation of an activated sludge wwtp.

Laboratories

- Biological phosphorus removal
- Nitrogen removal
- Mechanical sludge dewatering

Teaching methods

lecture: inform., problem, program text, method: problem, exercise, design, case study, laboratory, demonstration

Bibliography

Basic

1. Łomotowski J., Szpindor A.: Nowoczesne systemy oczyszczania ścieków. Arkady, Warszawa 1999 r.

3. . Praca zbiorowa pod redakcją Z. Dymaczewskiego: Poradnik eksploatatora oczyszczalni ścieków. wyd.3, PZITS, Poznań 2011
4. Heidrich Z., Witkowski A.: Urządzenia do oczyszczania ścieków. Projektowanie, przykłady obliczeń. Wyd. Seidel-Przywecki Sp. z o.o., Wyd. 1, Warszawa 2005 (wyd. 2, 2010)
5. Jaroszyński Ł., Jaroszyński T.: Dobór procesów do oczyszczania ścieków i przeróbki osadów ściekowych w komunalnych oczyszczalniach ścieków. Forum eksploatatora. 3/2017 (90), s. 40-43

Additional

1. Wastewater Engineering. Treatment and Reuse. Metcalf & Eddy. Inc. Mc Graw Hill, 4th edition international, 2004

Breakdown of average student's workload

	Hours	ECTS
Total workload	150	6,0
Classes requiring direct contact with the teacher	75	3,0
Student's own work (literature studies, preparation for laboratory classes/tutorials, preparation for tests/exam, project preparation) ¹	75	3,0

¹ delete or add other activities as appropriate
