

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Eligible humanistic subject (Social psychology)

Course

Field of study

Chemical Technology

Area of study (specialization)

Level of study

First-cycle studies

Form of study

full-time

Year/Semester

I/1

Profile of study

general academic

Course offered in

English

Requirements

elective

Number of hours

Lecture

30

Laboratory classes

Other (e.g. online)

Tutorials

Projects/seminars

Number of credit points

3

Lecturers

Responsible for the course/lecturer:

dr Radosław Kot

Responsible for the course/lecturer:

Prerequisites

The student starting this subject should be familiar with the basic concepts of social behavior mechanisms, have the ability to perceive, associate and interpret basic phenomena occurring in social relations, be aware of the importance of psychological mechanisms in professional and private life.

Course objective

The goal is to develop skills: explaining and predicting social behavior, including shaping and leading teams; resisting group influence; persuasion and shaping attitudes; motivation; shaping desirable social relationships.

Course-related learning outcomes

Knowledge

The student has the general knowledge necessary to understand the social and non-technical conditions of engineering activities [K_W16]

Skills

The student is able, when formulating and solving engineering problems, to see their systemic and non-technical aspects [K_U09]

The student is able to cooperate in a team, plan and organize team work [K_U22]

Social competences

The student understands the need for further training and raising their professional and personal competences [K_K01]

The student is aware of the importance and understanding of non-technical aspects and effects of engineering activities, including its impact on the environment and the associated responsibility for decisions [K_K02]

The student is aware of the responsibility for their own work and the willingness to submit to work in a team and take responsibility for jointly implemented tasks [K_K04]

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Formative assessment: Questions summarizing individual issues, giving the student the opportunity to assess the understanding of the problem; written assignments checking the degree of mastery of the current material. Points obtained in this way are added to the points from the final test. Summative assessment: Written test of the subject, closed questions test

Programme content

- 1. Psychology, social psychology - characteristics, genesis, main trends
- 2. Human nature - personality, temperament, emotional intelligence, brain sex, cerebral hemispheres specialization theory
