Lecturers

Responsible for the course/lecturer:

Responsible for the course/lecturer:

prof. dr hab. inż. Adam Voelkel

Prerequisites

Basic physical, inorganic, organic and analytical chemistry on academic level; Can use basic laboratory techniques of separation and cleaning of chemical compounds

Course objective

Gaining the skills of the application of spectroscopic methods (UV, IR, NMR MS) for identification of organic compounds and determination of their structure.

Course-related learning outcomes

Knowledge

1. knowledge in the field of techniques, methods connected with identification of organic pollutants in the environment - [K_W07,K_W09]
2. can describe methods, techniques, tools and materials used for the solution of simple problems connected with identification of substances during solving the problems connected with the field of study - [K_W05, K_W12, K_W13]

Skills

1. Student can select the proper spectroscopic technique for basic qualitative and quantitative determination of organic compounds - [K_U11, K_U12, K_U13]
2. has basic skills for maintenance of basic tools (methods) for solving the problem in the field of environment analysis - [K_U15, K_U18]
3. Student can use specialist English . - [K_U03, K_U05, K_U08]

Social competences

Student understands the need to supplement her/his education and increasing professional competences. - [K_K01]

2. Student has the awareness to obey the engineer ethic rules. - [K_K02, K_K05]
3. Student can act and cooperate in the group accepting different roles. - [K_K03]

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Permanent control before laboratory classes. Written reports from exercises

Programme content

Course will offer the extension of the knowledge on the techniques applying the interactions of electromagnetic radiation with the molecules of organic compounds as well as the possibilities of their use for identifications of organic species. Possibilities and limitations of: UV/VIS, IR/FTIR, NMR MS are discussed. Sample preparation is presented during laboratory practice..
