

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS) pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

COURSE DESCRIPTION CARD - SYLLABUS

Course name		
Management in transport		
Course		
Field of study		Year/Semester
Transport		2/4
Area of study (specialization)		Profile of study
-		general academic
Level of study		Course offered in
First-cycle studies		Polish
Form of study		Requirements
part-time		elective
Number of hours		
Lecture	Laboratory clas	sses Other (e.g. online)
18	0	0
Tutorials	Projects/semin	lars
9	0	
Number of credit points		
3		
Lecturers		
Responsible for the course/lecturer:		Responsible for the course/lecturer:
dr inż. Anna Kobaszyńska-Twardowska		Second person allowed
email: anna.kobaszynska-

tel. 61-224 45 11		
Wydział Inżynierii Lądowej i T	ransportu	
ul. Piotrowo 3, 60-965 Poznar	í	
Prerequisites		
KNOWLEDGE: The student ha	s a basic knowledge of	managing transport processes and its stages

The student knows and understands the basic methods and practical tools in the field of transport description.

The student knows the main tasks of transport in the area of operation and economic development of enterprises and the state.

SKILLS: The student is able to use the concepts and methods in the description of technical and economic problems.

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS) pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

The student is able to use the acquired knowledge to analyze specific phenomena and processes occurring in technical and economic systems.

The student is able to solve specific tasks appearing in technical and economic systems.

SOCIAL COMPETENCES: The student is able to work in a group, assuming various roles in it. The student is able to determine the priorities important in solving the tasks set before him.

The student is independent in solving problems, gaining and improving the acquired knowledge and skills.

Course objective

The aim of the course is to provide students with information on transport management, primarily the principles of transport organization and planning. Students acquire knowledge and skills of effective management in transport against the background of the globalization processes of the economy.

Course-related learning outcomes

Knowledge

Student has a structured and theoretically founded general knowledge in the field of key technical issues and detailed knowledge of selected issues in this discipline of transport engineering.

Skills

Student is able to obtain information from various sources, including literature and databases, both in Polish and in English, integrate it properly, interpret and critically evaluate it, draw conclusions, and exhaustively justify opinions.

Student is able to properly use information and communication techniques applicable at various stages of the implementation of transport projects.

Student is able to formulate and solve tasks in the field of transport, apply appropriately selected methods, including analytical, simulation or experimental methods.

Student is able to take into account in the process of formulating and solving tasks in the field of transport engineering also non-transport aspects, in particular social, legal and economic issues.

Social competences

Student understands that in technology, knowledge and skills very quickly become obsolete.

Student is able to think and act in an entrepreneurial way, incl. finding commercial applications for the created system, taking into account not only the business benefits, but also the social benefits of the conducted activity.

Student is aware of the social role of a technical university graduate, in particular, he understands the need to formulate and convey to the society, in an appropriate form, information and opinions on engineering activities, technological achievements, as well as the achievements and traditions of the profession of a transport engineer.

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS) pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Written exam, final test

Programme content

The definition and scope of transport management. Characteristics of individual modes of transport. Functioning of modes and types of transport. Principles of operation and organization of national and international transport. Innovative logistics solutions in transport. The essence of service and freight forwarding in transport. Designing transport networks in terms of space and time. Designating service areas. Designing transport networks in terms of value, assessment of the profitability of investments in transport solutions. Cost calculations and locations of transhipment centers. Costs of transport processes. Prices and tariffs in transport. Methods of minimizing transport costs in the logistics system. INCOTERMS 2020 commercial formulas. Application of ratio analysis in the verification of transport processes. The concept of damage and complaints in transport. Methods and tools for the evaluation of transport service providers. Costs of the quality of transport services.

Teaching methods

- 1. Lecture with multimedia presentation
- 2. Exercises solving problemsems
