Course-related learning outcomes

Knowledge

Has knowledge of selected problems of higher mathematics.

Knows the application of higher mathematics to solve technical problems.

Skills

Can use the basic knowledge of higher mathematics as a tool in management.

Can use mathematical apparatus in studies.

Social competences

Understands and uses a formalized mathematical apparatus in management.

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Lectures: knowledge is verifited on the basis of written exam. The exam consists of 6 calculation tasks. Passing threshold: 50%

Tutorials: knowledge is verified on the basis of one 75-minute test at the end of the semester. The written test consists of 5 tasks. Passing threshold: 50%

Programme content

The following content is realized both on lectures and tutorials

Elements of linear algebra:

- matrices and determinants,
- systems of linear equations,
- vectors, scalar and vector product,
- Functions of one variable:
- graphs of elementary and rational functions,
- function limits,
- inverse functions.

Differential calculus of one-variable functions.

Teaching methods

Lecture: oral presentation with examples and formulas, which are presented using a visualizer.

Tutorials: presentation of sample tasks on the board followed by independent solving of similar examples by students.
