

## COURSE DESCRIPTION CARD - SYLLABUS

Course name

German [S1BZ1E>JN1]

### Course

Field of study

Sustainable Building Engineering

Year/Semester

1/2

Area of study (specialization)

–

Profile of study

general academic

Level of study

first-cycle

Course offered in

english

Form of study

full-time

Requirements

elective

### Number of hours

Lecture

0

Laboratory classes

0

Other (e.g. online)

0

Tutorials

60

Projects/seminars

0

### Number of credit points

4,00

### Coordinators

mgr Ewa Kapalczyńska

ewa.kapalczynska@put.poznan.pl

### Lecturers

mgr Joanna Skrobala

joanna.skrobala@put.poznan.pl

### Prerequisites

The already acquired language competence compatible with level A2 (CEFR). The ability to use vocabulary and grammatical structures required on the high school graduation exam with regard to productive and receptive skills. The ability to work individually and in a group; the ability to use various sources of information and reference works.

### Course objective

Advancing students language competence towards at least level B1 (CEFR). Development of the ability to use academic and field specific language effectively in both receptive and productive language skills. Improving the ability to understand field specific texts, familiarizing students with basic translation techniques. Improving the ability to function effectively on an international market and on a daily basis.

### Course-related learning outcomes

Knowledge:

As a result of the course, the student ought to acquire field specific vocabulary related to the following issues: basics of mathematics and geometry, construction planning, buildings, building materials. The student is able to define and explain associated terms, phenomena and processes.

#### Skills:

1. As a result of the course, the student is able to give a talk on field specific or popular science topic (in German) .
- 2.The student is able to express basic mathematical formulas and to interpret data presented on graphs/diagrams.
- 3.The student is able to discuss general and field specific issues using an appropriate linguistic and grammatical repertoire
- 4.The student is able to formulate a text in German where he/she explains/describes a selected field specific topic .

#### Social competences:

1. As a result of the course, the student is able to communicate effectively in a field specific/professional area, and to give a successful presentation in German.
- 2.The student is able to recognize and understand cultural differences in a professional and private conversation, and in a different cultural environment.

### Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Learning outcomes presented above are verified as follows:

Formative assessment: tests during academic year (written and oral, MT) presentations. Summative assessment: credit. To obtain a positive assessment the student is obliged to pass the material covered by the program with at least 50%.

### Programme content

- Mathematics and geometry
- Construction work, machinery and tools
- Main civil engineering professions
- Construction planning and realization, construction documents
- Types of buildings, house elements
- Types of building materials: brick,concrete , ecological materials, artificial materials
- Presentations
- Mathematics and geometry
- Building stages, construction documentation
- Types of buildings, house elements
- Types of building materials: brick, concrete, ecological materials, artificial materials
- Presentations

### Teaching methods

- 1.Multimedia presentation, analysis of topics/problems through examples shown on the board, lexical and grammatical tasks,
- 2.Language practice: discussion, teamwork, case study, linguistic and integration games,
- 3.Student's individual work, reading and listening comprehension exercises, writing practice.

### Bibliography

#### Basic

- 1.Matuszak, E./Tomaszczyk, A.: Deutsch für Profis,branża budowlana, LektorKlett, Poznań 2013

#### Additional

1. Hanus, A.: Mein Beruf ćwiczenia z języka niemieckiego, profil budowlany, Wyd. REA, 2011
- 2.Targosz, E.: Energiesparendes und umweltfreundliches Bauen, Kraków 2017
- 3.Jin,F./Foß,U.: Grammatik aktiv, Cornelsen , Berlin 2018
4. Professional literature (online resources)

### Breakdown of average student's workload

	Hours	ECTS
Total workload	0	0,00
Classes requiring direct contact with the teacher	0	0,00
Student's own work (literature studies, preparation for laboratory classes/ tutorials, preparation for tests/exam, project preparation)	0	0,00
