

COURSE DESCRIPTION CARD - SYLLABUS

Course name

English [N1Energ1>JA2]

Course

Field of study

Power Engineering

Year/Semester

2/4

Area of study (specialization)

–

Profile of study

general academic

Level of study

first-cycle

Course offered in

polish

Form of study

part-time

Requirements

elective

Number of hours

Lecture

0

Laboratory classes

0

Other (e.g. online)

0

Tutorials

20

Projects/seminars

0

Number of credit points

1,00

Coordinators

mgr Alicja Lamperska

Lecturers

Prerequisites

Language competence compatible with level B1(CERF). The ability to use vocabulary and grammatical structures required on the high school graduation exam regarding productive and receptive skills. The ability to work individually and in a group. The ability to use various sources of information and reference works. The ability to use general and specialist vocabulary acquired during the previous term English course.

Course objective

To help the student achieve the ability to use general and field-specific language effectively, with respect to the following language skills: listening, reading, writing, speaking. To advance the student's language competence towards level B2 (CEFR). To improve the student's ability to function effectively on the international job market and in everyday life. To foster the habit of logical thinking (analysis and synthesis of information).

Course-related learning outcomes

Knowledge:

the student has acquired field-specific vocabulary related to the following issues: electromagnetic induction, transformer, generator, types and forms of energy, heat transfer, transmission and distribution

of electricity, smart grid.

Skills:

the student is able to use english to provide definitions of terms, and explain phenomena and processes referred to in the programme ; interpret source materials.

Social competences:

the student is able to communicate effectively in the general and field-specific areas, and communicate in english in public.

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Learning outcomes presented above are verified as follows:

Formative assessment: regular assessment of in-class performance and home assignments, quizzes.

Summative assessment: two 60-minute written quizzes featuring a battery of tests. Successful completion of home assignments and a 60% score on quizzes are required to obtain a pass.

Programme content

Field-specific topics: Electromagnetic induction. Transformer. Generator. Types and forms of energy. Heat transfer. Transmission of electrical energy. Smart grid. Grammatical structures compatible with level B2 (CERF) .

Teaching methods

Classroom activities guided by the communicative approach.

Breakdown of average student's workload

	Hours	ECTS
Total workload	39	1,00
Classes requiring direct contact with the teacher	22	1,00
Student's own work (literature studies, preparation for laboratory classes/ tutorials, preparation for tests/exam, project preparation)	17	1,00
