

## COURSE DESCRIPTION CARD - SYLLABUS

Course name

Mathematics [S1IBez2>MAT]

### Course

Field of study

Safety Engineering

Year/Semester

1/1

Area of study (specialization)

–

Profile of study

general academic

Level of study

first-cycle

Course offered in

polish

Form of study

full-time

Requirements

compulsory

### Number of hours

Lecture

15

Laboratory classes

0

Other (e.g. online)

0

Tutorials

30

Projects/seminars

0

### Number of credit points

3,00

### Coordinators

dr Grzegorz Grzegorzcyk

grzegorz.grzegorzcyk@put.poznan.pl

dr hab. Małgorzata Migda

malgorzata.migda@put.poznan.pl

### Lecturers

dr Grzegorz Grzegorzcyk

grzegorz.grzegorzcyk@put.poznan.pl

### Prerequisites

Basics of mathematics - secondary school level. Logical and scientific thinking, efficient calculating.

### Course objective

The subject is aimed at introducing basic terms from the area of mathematics such as linear algebra and differential calculus; giving skills and competences for solving fundamental mathematic topics and for using mathematics in management.

### Course-related learning outcomes

Knowledge:

Student knows the issues of mathematics and statistics in the field of solving practical engineering problems [K1\_W04].

Skills:

Student is able to properly select the sources and information derived from them, making an assessment, critical analysis and synthesis of this information [K1\_U01].

Student is able to identify changes in the requirements, standards, regulations and technical progress and the reality of the labor market, and on their basis determine the need for supplementing knowledge. [K1\_U12].

Social competences:

Student is aware of the recognition of the importance of knowledge in solving problems in the field of safety engineering and continuous improvement [K1\_K02].

Student is aware of the responsibility for their own work and readiness to submit to the rules of working in a team and bearing responsibility for jointly performed tasks [K1\_K07].

### Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Lecture: a written test on the last lecture. Passing threshold: 50% of points.

Classes: evaluation of two written tests (on 7th and 14th weeks), two quizzes and the direct activity during the classes. Passing threshold: 50% of points.

### Programme content

Elements of linear algebra: matrices, inverse matrix, row of matrix, systems of linear equations, (Cramer Theorem, method of Gaussian Elimination, Kronecker-Capelli Theorem). Applications of matrices in economics.

Elementary functions (formulas, graphs, properties). Sequences, monotonic sequences, the limit of a sequence, the arithmetic of limits. Continuity, limits of functions, asymptote. Derivative and its geometric interpretation, monotonicity intervals, extrema, L'Hospital's rule; application of the derivative in economics. Indefinite integral, methods of integration. Definite integral and its application.

### Teaching methods

- lecture with multimedia presentation accompanied with examples presented on the blackboard, theory presented with connections of current knowledge from previous lectures and with questions to the group of students;
- classes: solving problems on the board, initiating discussion about the solutions.

### Bibliography

Basic:

1. Foltyńska I., Ratajczak Z., Szafranski Z., Matematyka dla studentów uczelni technicznych, cz. I -II, Wydawnictwo Politechniki Poznańskiej, Poznań 2004.
2. Textbooks from the Mathematics series for technical university students, Oficyna Wyd. GiS:
  - - Gewert M., Skoczylas Z., Analiza matematyczna 1, Analiza matematyczna 2, Definicja, twierdzenia, wzory.
  - Gewert M., Skoczylas Z., Analiza matematyczna 1, Przykłady i zadania.
  - Jurlewicz T. , Skoczylas Z. , Algebra liniowa 1, Definicja, twierdzenia, wzory.
  - Jurlewicz T., Skoczylas Z. , Algebra liniowa 1, Przykłady i zadania.

Additional:

1. Krysicki W., Włodarski L., Analiza matematyczna w zadaniach, cz. I, Wydawnictwo Naukowe PWN.
2. Banaś J., Podstawy matematyki dla ekonomistów, Wydawnictwo Naukowo- Techniczne, Warszawa 2005.

### Breakdown of average student's workload

	Hours	ECTS
Total workload	75	3,00
Classes requiring direct contact with the teacher	45	2,00
Student's own work (literature studies, preparation for laboratory classes/ tutorials, preparation for tests/exam, project preparation)	30	1,00
