Improving the ability to understand field specific texts and to function effectively on an international market and in a daily basis situations.

#### Course-related learning outcomes

- Knowledge:
- 5. Anatomy
- 6. Biomechatronics
- 7. Prosthetics
- 8. Artificial Heart
- 9. Cochlear Aids

#### 10. Medical imaging

11. Targeted drug delivery systems.

Skills:

As a result of the course, the student is able to:

1. Give a talk/presentation on field specific and popular science topic (in English), and discuss general and field specific issues using an appropriate linguistic and grammatical repertoire

- 2. Express basic mathematical formulas and interpret data presented on graphs/diagrams
- 3. Formulate a text in English on a selected field specific topic

Social competences:

As a result of the course, the student is able to communicate effectively in a field specific/professional area, and to give a successful presentation in English. The student is also able to recognize and understand cultural differences in a professional and private conversation, and in a different cultural environment.

# Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Learning outcomes presented above are verified as follows:

The knowledge acquired during classes is verified by at least two pre-announced tests per semester. Each test consists of questions (multiple choice and open questions) with different points. Passing threshold is 60%. Additionally, once a year, students prepare a presentation on a selected field ralated topic and receive points for class activity.

# Programme content
