Lecturers

Prerequisites

The Student defines the concepts of: production process, production costs, materials, production capacity, production logistics, buyer, customer, price and methods of its calculation, supply, demand (and other concepts in the field of enterprise management included in the training program). The Student characterizes the stages of the production process and assign them costs. The Student formulates opinions on the basis of group discussion, brainstorming, implemented SWOT and PEST analyzes, explain their applications and summarize and recommend corrective actions. The Student creates: financial analysis, turnover and balance statement, SWOT analysis, PEST, product life cycle; matrices: BCG, GE, McKinsey; marketing plan. The Student can create a company development plan based on available market data. The Student is able to draw conclusions from the decisions taken and to plan and introduce the corrective actions. The Student is responsible for the timely implementation of tasks. The Student actively participates in both lecture classes and exercises. The Student is able to work in a group and make individual and group decisions. The Student follows the norms of social life. The Student is determined to solve tasks creatively and realize assigned projects.

Course objective

Developing the potential of knowledge, skills and attitudes in making management decisions in marketing and market based on acquired knowledge and skills acquired at the first level of education at the university using simulation games.

Course-related learning outcomes

Knowledge:

The student describes detailed knowledge of the use of modeling of information and decision-making processes in the development of marketing strategies [P7S_WG_02].

The student identifies management research methods and their application to marketing strategy [P7S_WG_04].

The student explains the dynamics of network organizations and understands the impact of these dynamics on marketing activities [P7S_WG_06].

The student characterizes advanced methods of market data analysis and their application in marketing [P7S_WG_07].

The student discusses ethical dimensions in marketing management [P7S_WK_01].

Skills:

The student applies theoretical approaches to analyze and solve marketing problems [P7S_UW_01].

The student uses advanced management methods to forecast marketing trends [P7S_UW_02].

The student critically evaluates the effectiveness of applied marketing tools in various business contexts [P7S_UW_03].

The student demonstrates the ability to create innovative marketing strategies and implement them [P7S_UW_04].

The student acquires the ability to interpret complex market data and use it in the marketing decision-making process [P7S_UW_06].

Social competences:

The student gains competence in integrating knowledge from various fields to create effective marketing strategies [P7S_KK_01].

The student analyzes and evaluates complex market situations to prioritize marketing activities [P7S_KK_02].

The student effectively manages marketing projects, taking into account their social and business aspects [P7S_KO_01].

The student develops skills in initiating and implementing marketing projects, taking into account their impact on the social environment [P7S_KO_02].

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Knowledge - written or oral exam.

Skills - credit.

Social competences - work in project teams (internal team division of grades).
