

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Business Planning [S2IZarz1E>PB]

Course

Field of study

Engineering Management

Year/Semester

1/1

Area of study (specialization)

Managing Enterprise of the Future

Profile of study

general academic

Level of study

second-cycle

Course offered in

english

Form of study

full-time

Requirements

elective

Number of hours

Lecture

15

Laboratory classes

0

Other (e.g. online)

0

Tutorials

15

Projects/seminars

0

Number of credit points

2,00

Coordinators

dr inż. Edmund Pawłowski

edmund.pawlowski@put.poznan.pl

Prerequisites

Management Basics, Financial Accounting

Course objective

teaching methodology and developing skills for designing and evaluating investment projects

Course-related learning outcomes

Knowledge:

The student defines and explains the methodologies and procedures of business planning including the annual activities of the enterprise and the design of new businesses [P7S_WG_02].

The student evaluates the complexity of business design processes including new business creation and investment planning and knows the standards for technical, organizational, marketing and financial planning [P7S_WG_02].

The student demonstrates understanding and application of knowledge of organizational structures,

analyzing and modeling them in the context of planning and designing new business ventures [P7S_WG_05].

The student analyzes dependencies and interrelationships in various forms of network organizations and applies this knowledge to design business strategies, especially in digital and global contexts [P7S_WG_06]. al relations between organisational units of the enterprise and virtual units - [P7S_WG_06]

Skills:

The student applies advanced modeling tools and methods to forecast and design business ventures for new and existing organizations [P7S_UW_02].

The student independently proposes business solutions and strategies using knowledge of organizational structures [P7S_UW_04].

The student analyzes the influence of social, cultural, political, legal and economic factors on business design and formulates hypotheses on the effectiveness of business strategies [P7S_UW_07].

The student manages his/her own work and collaborates effectively in project teams, focusing on business design, with an understanding of responsibility and leadership [P7S_UO_01].

Social competences:

The student combines knowledge from different disciplines when working in project teams to develop effective business plans [P7S_KK_01].

The student identifies cause-and-effect relationships in achieving business objectives and assesses their relevance in a dynamic business environment [P7S_KK_02].

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

The knowledge of the lectures is verified during the written test. Written test in two versions: 1/ 5 open questions, 2/ 10 multiple-choice test questions. Maximum number of points = 100. Positive score from 65 points.

Knowledge from the exercises is verified by defending the project
