

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Contemporary Concepts of Management [S2IZarz1E>WSZ]

Course

Field of study

Engineering Management

Year/Semester

1/2

Area of study (specialization)

Managing Enterprise of the Future

Profile of study

general academic

Level of study

second-cycle

Course offered in

english

Form of study

full-time

Requirements

compulsory

Number of hours

Lecture

30

Laboratory classes

0

Other (e.g. online)

0

Tutorials

0

Projects/seminars

15

Number of credit points

4,00

Coordinators

prof. dr hab. inż. Stefan Trzcieliński
stefan.trzcielinski@put.poznan.pl

Lecturers

Prerequisites

Knowledge about: microeconomics, strategic management, functional subsystems management.

Course objective

To familiarize students with: the paradigms of enterprise management and the factors triggering their change, metaconcepts of a lean and agile enterprise, concepts and methods belonging to the metaconcepts. Development of skills of situational selection and application of concepts and methods in practice.

Course-related learning outcomes

Knowledge:

The student accurately defines and delineates contemporary enterprise paradigms and identifies factors influencing their change. Demonstrates an understanding of Lean and Agile meta-concepts and uses them in analyzing and shaping enterprise agility [P7S_WG_04].

The student describes various management concepts, presents their theoretical underpinnings and uses research methods to analyze and practically apply these concepts to enterprise management [P7S_WG_04].

The student characterizes the stages of modeling changes in organizational structures using Lean and Agile concepts. Demonstrates the ability to shape the agility of an organization in practice by applying appropriate modeling methods [P7S_WG_05].

The student analyzes the specifics of network organizations, including virtual ones, and identifies organizational dependencies. Demonstrates the ability to study these dependencies in the context of value creation in enterprises and their ecosystems [P7S_WG_06].

Skills:

The student uses the acquired knowledge to evaluate the effectiveness and usefulness of various management methods, especially in the context of knowledge management in an organization, demonstrating this through the analysis of case studies or projects [P7S_UW_03].

The student integrates knowledge from various management disciplines to evaluate and critically analyze modern management concepts, and then applies these concepts to business practice, demonstrating this through a specific project or situational analysis [P7S_UW_03].

The student independently develops innovative management solutions using Lean and Agile concepts, including process design and implementation, demonstrating this through the development and presentation of a project plan [P7S_UW_04].

The student conducts in-depth theoretical and practical analysis of social phenomena affecting management using research methods, as demonstrated through the development of a case study or survey [P7S_UW_05].

The student interprets and explains complex social phenomena and their impact on business management, using interdisciplinary management concepts and providing examples of their application [P7S_UW_06].

The student analyzes the causes and course of business and social processes and forms reasoned opinions in the context of business management, relying on data and evidence [P7S_UW_07].

Social competences:

The student identifies and analyzes cause-and-effect relationships in the business environment, applying agile and adaptive management concepts to evaluate and prioritize strategic tasks [P7S_KK_02].

The student plans and manages business ventures using modern management methods to increase operational efficiency and innovation [P7S_KO_03].

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Performing micro tasks during lectures; assessment of a project on management system supported by selected methods.

Programme content

Enterprise paradigms and factors causing their change; Lean and Agile metaconcepts and management methods belonging to them; shaping the agility of the enterprise; KBE; knowledge management in the organization.

Teaching methods

Seminar lecture; project of management system supported by selected methods.

Breakdown of average student's workload

	Hours	ECTS
Total workload	100	4,00
Classes requiring direct contact with the teacher	45	2,00
Student's own work (literature studies, preparation for laboratory classes/ tutorials, preparation for tests/exam, project preparation)	55	2,00
