Prerequisites

Basic knowledge of technique.

Course objective

To familiarize students with the basic principles of construction, operation and operation of general purpose machines and equipment, which are equipped in an industrial plan.

Course-related learning outcomes

Knowledge:

1. The student knows the basic issues of construction of machines related to logistics [P6S_WG_01]
2. The student knows the basic issues of mechanics, and operation of machines related to logistics [P6S_WG_02]

Skills:

1. Student is able to apply appropriate analysis techniques to solve a problem related to the construction and operation of machines [P6S_UW_03]
2. Student is able to identify changes in norms, standards and regulations in the field of mechanical

engineering [P6S_UU_01]

Social competences:

1. Student is aware of initiating activities related to the formulation and transfer of information about the proper operation of machines [P6S_KO_02]
2. Student is aware of cooperation and team work to solve problems related to the operation of machines [P6S_KR_02]

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Lecture: Formative assessment: on the basis of answers to questions about material modified in previous lectures. Summary assessment: written test on the basis of previously prepared questionnaire.

Programme content

Lecture: Introduction to subject matter, basic concepts, machine classification. Standardization, typisation and unification of machine parts and subassemblies. Clutches, brakes, gears. Mechanisms used in machine tools. Machines and devices for transport, trolleys, cranes, overhead cranes, cranes, conveyors. Compressors and fans. Pumps, water motors, turbines. Installations, pneumatic, hydraulic. Refrigeration equipment. Internal combustion engines.

Teaching methods

Lecture: monographic with the use of a computer with the division of the content of the program into separate thematic issues in connection.

Breakdown of average student's workload

| | Hours | ECTS |
|---|-------|------|
| Total workload | 25 | 1,00 |
| Classes requiring direct contact with the teacher | 8 | 0,50 |
| Student's own work (literature studies, preparation for laboratory classes/ tutorials, preparation for tests/exam, project preparation) | 17 | 0,50 |
