POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

COURSE DESCRIPTION CARD - SYLLABUS

Course name Heating and cooling devices [S2Trans1-TrD>UGiCh]

Course			
Field of study Transport		Year/Semester 1/2	
Area of study (specialization) Road Transport		Profile of study general academic	;
Level of study second-cycle		Course offered in polish	
Form of study full-time		Requirements compulsory	
Number of hours			
Lecture 30	Laboratory classe 0		Other (e.g. online) 0
Tutorials 15	Projects/seminars 0	5	
Number of credit points 4,00			
Coordinators		Lecturers	
dr hab. inż. Krzysztof Bieńczak p krzysztof.bienczak@put.poznan.			

Prerequisites

KNOWLEDGE: Student has a general knowledge of the impact of technical facilities and technologies on the environment SKILLS: Student is able to define the threats to the environment that constitute a specific technological process implemented in the area of production and operation of food machines and refrigeration devices and to indicate ways of counteracting these threats. SOCIAL COMPETENCES: Work in the interdisciplinary team. Ability to lead a team and expand team knowledge.

Course objective

Overview of the transport rules for products requiring controlled temperatures.

Course-related learning outcomes

Knowledge:

Has ordered and theoretically founded general knowledge related to key issues in the field of transport engineering. Has advanced detailed knowledge of selected issues in the field of transport engineering.

Skills:

Is able to obtain information from literature, databases and other sources (in Polish and English),

integrate them, interpret and critically evaluate them, draw conclusions and formulate and exhaustively justify opinions. Is able to make a critical analysis of existing technical solutions and propose their improvements.

Social competences:

Student understands that in the field of transport engineering, knowledge and skills very quickly become obsolete.

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Learning outcomes presented above are verified as follows:

The knowledge acquired during the lecture is verified on the basis of a written exam in the form of test. The skills acquired during the exercises are verified on the basis of a final test in the form of a written test.

Programme content

Transport of food and dangerous poducts at controlled temperatures. Classification of vehicles for transport under controlled temperatures. Devices that ensure the cryptoclimate in the cargo space. Rules for the operation of devices responsible for the parameters of the cryptoclimate.

Teaching methods

Information and problematic lecture with a multimedia presentation. Exercises - solving problems.

Bibliography

Basic

1. Zwierzycki W., Bieńczak K., Pojazdy chłodnicze w transporcie żywności , Syntherm Poznań 2006 2. Kwaśniowski S., Pojazdy izotermiczne i chłodnicze, Navigator Wrocław 1997 Additional

1. B. Guziński, Chłodnictwo dla praktyków, Systherm Serwis, Poznań 2013

Breakdown of average student's workload

	Hours	ECTS
Total workload	90	4,00
Classes requiring direct contact with the teacher	45	2,00
Student's own work (literature studies, preparation for laboratory classes/ tutorials, preparation for tests/exam, project preparation)	45	2,00
