Prerequisites

Having language competence corresponding to the B1 level according to the description of the levels of language proficiency (CEFR). Mastering grammatical structures as well as general and technical vocabulary required at the 1st cycle studies. Ability to work independently and in a team; ability to use various sources of information.

Course objective

1. Bringing the language competences of students to the minimum B2 level (CEFR). 2. Developing the ability to use effectively a general academic language and a specialist language appropriate for a given field of study, within the scope of four language skills. 3. Improving the ability to work with a technical text (familiarizing students with the basic translation techniques). 4. Improving the ability to function on the international labor market and in everyday life.

Course-related learning outcomes

Knowledge:
The student has knowledge of important development trends and the most important technical achievements and of other related scientific disciplines, in particular transport engineering.

Skills:
The student is able to obtain information from various sources, including literature and databases (in Polish and English or other language), integrate it properly, interpret it and critically evaluate it, draw conclusions, and comprehensively justify his/her opinion.
The student is able to prepare and present, in Polish and English or other language, a well-documented study of problems in the field of transport engineering, including oral presentations.
The German language skills of the student are compliant with the B2 level requirements of the European Framework of Reference for Languages (CEFR).

Social competences:
The student is aware of the social role of a technical university graduate, in particular, he/she understands the need to formulate and transfer to the society, in an appropriate style, information and opinions on engineering activities, technological achievements, as well as the achievements and traditions of the transport engineer profession.

Methods for verifying learning outcomes and assessment criteria
Learning outcomes presented above are verified as follows:

Learning outcomes presented above are verified as follows:
1. Formative assessment: assessment during language classes: speech/presentation, tests
2. Summative assessment: credit

Programme content

1. Mathematics; describing charts
2. Logistics in general
3. Freight
4. Documents and correspondence in Logistics
5. Division and classification of materials
6. Car parts

Teaching methods

exercises: reading, writing, speaking and hearing
