|  |                        |   |                          |

## Prerequisites

- no medical contraindications to participate in classes - willingness to learn about exercises and training methods

### Course objective

Functional training is a training in which exercises are performed in which the movement is similar to what we do in everyday life. There are many strength exercises (but without such weights as in the gym) and coordination, flexibility, etc. We exercise using TRX tapes, dumbbells, balls, small barbells, rubber bands, etc. Of course, with music. Thanks to the use of all this, our body develops comprehensively. We care about the variety of movements and loads, that's why everyone will find something for themselves in these classes ... of course, fatigue is indispensable in functional training, which we will not avoid ;) but the end result is worth sacrificing ....

#### Course-related learning outcomes

The student knows the basic muscle groups and acquires the knowledge of how to perform exercises correctly and safely

Knows the exercises that he can safely perform on his own

Is aware of the balanced and harmonious development of his body

Knows the basic objectives and principles of warm-up

Performs correctly exercises in supports, using available equipment and instruments

Is able to select training volume

Acquires awareness of his/her body to skillfully select exercises for its formation and proper development.

#### Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Completing the course is achieved through active and regular participation in classes.

Two absences are possible without the obligation to make up or justify 30 hours per semester.

The student is obliged to make up for remaining absences and short-term sick leave in consultation with his/ her teacher.

It is possible to complete two classes a week.

You can participate in physical education classes no more than once a day.

Classes must be made up on a day other than the scheduled classes.

#### Programme content

Principles of exercise during functional training strength exercises with own resistance coordination exercises flexibility exercises exercises using equipment shaping strength, efficiency, speed

### **Course topics**

Functional Training as a set of exercises in which movement is similar to activities in everyday life strength exercises (mainly with own resistance) coordination exercises flexibility exercises exercises with TRX tape exercises using dumbbells, balls, small barbells, bands, etc. developing strength, efficiency and flexibility

### **Teaching methods**

- verbal description
- -show
- practical exercises

### Bibliography

"Nowoczesny trening funkcjonalny" Boyle M.

Breakdown of average student's workload

|  | Hours | ECTS |
|--|-------|------|
| Total workload   | 30    | 0,00 |
| Classes requiring direct contact with the teacher  | 30    | 0,00 |
| Student's own work (literature studies, preparation for laboratory classes/<br>tutorials, preparation for tests/exam, project preparation) | 0     | 0,00 |
