

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Ergonomics [S1ETI1>Ergo]

Course

Field of study

Education in Technology and Informatics

Year/Semester

1/2

Area of study (specialization)

–

Profile of study

general academic

Level of study

first-cycle

Course offered in

Polish

Form of study

full-time

Requirements

compulsory

Number of hours

Lecture

15

Laboratory classes

15

Other (e.g. online)

0

Tutorials

0

Projects/seminars

0

Number of credit points

3,00

Coordinators

dr Małgorzata Wojsznis

Lecturers

Prerequisites

The student should have knowledge of the operation and organization of enterprises, production or service plants. He/she should be aware of the risks in the workplace and be able to identify them. The student should be able to use regulations and normative acts.

Course objective

The aim of the course is to familiarize students with issues related to the ergonomic organization of workplaces, workload and loads from work environment, as well as ergonomic diagnosis of workplaces.

Course-related learning outcomes

Knowledge:

the student knows the ergonomic requirements for machines and working environment.

the student knows the methods of ergonomic diagnosis and workplace design.

the student knows the scope of the given discipline and contemporary trends in this area.

Skills:

the student is able to identify hazards and assess occupational risks in the workplace.

the student is able to assess the influence of work and factors occurring in the work environment on the employee and to evaluate the usefulness of the methods used for the assessment.

the student knows how to use regulations and normative acts to optimize solutions improving ergonomics of the workplace.

Social competences:

the student is aware of the role of the individual in solving the issues of ergonomic shaping of the working environment and makes efforts to convey, in a commonly understood way, his knowledge and

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Learning outcomes presented above are verified as follows:

Knowledge acquired as part of the lecture is verified on the basis of the final test during the last class in the semester. The test consists of 20 single-choice questions. In each question, 1 point is obtained for the correct answer. Passing threshold: 50%.

Wiedza oraz umiejętności nabyte w ramach zajęć laboratoryjnych są weryfikowane na podstawie sprawozdań z wykonanych ćwiczeń oraz sprawdzianów z zagadnień kontrolnych.

Programme content

1. Basics of ergonomics, directions and areas of expertise
2. The man in the work process - the basic ergonomic system
3. Ergonomic workplace organisation
4. Ergonomic diagnosis of workplaces
5. Occupational risk assessment

Course topics

Lecture:

Basics of ergonomics, purpose and tasks, historical background. Directions and areas of expertise in ergonomics. The man in the work process - the basic ergonomic system. Ergonomic workplace organisation. The workload of a man. Ergonomic diagnosis of workplaces. Loads from the work environment. Occupational risk assessment. Supervision and control of working conditions in Poland.

Laboratoria:

Analiza zagrożeń na wybranym stanowisku pracy metodą Preliminary Hazard Analysis (PHA) i Job Safety Analysis (JSA). Ergonomiczne stanowisko komputerowe (optymalizacja stanowisk pracy). Badanie oświetlenia w pomieszczeniach. Wyznaczanie skuteczności akustycznej ochronników słuchu metodą audiometryczną. Ocena antropometryczna obiektu technicznego. Ocena komfortu cieplnego środowiska umiarkowanego na podstawie normy. Zastosowanie metody OWAS do analizy obciążenia statycznego na stanowisku pracy.

Teaching methods

Lecture: multimedia presentation illustrated with examples.

Laboratoria: przeprowadzanie ćwiczeń i wykonywanie sprawozdań z badań.
