

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Information safety culture [S2IBiJ1-BiZK>KBI]

Course

Field of study

Safety and Quality Engineering

Year/Semester

1/2

Area of study (specialization)

Safety and Crisis Management

Profile of study

general academic

Level of study

second-cycle

Course offered in

Polish

Form of study

full-time

Requirements

elective

Number of hours

Lecture

15

Laboratory classes

0

Other (e.g. online)

0

Tutorials

0

Projects/seminars

15

Number of credit points

2,00

Coordinators

dr hab. Joanna Sadłowska-Wrzesińska prof. PP
joanna.sadlowska-wrzesinska@put.poznan.pl

Lecturers

Prerequisites

The student has basic knowledge of security and information and information systems; he/she is able to recognize cause-effect relationships in the area of broadly understood security. The student is aware of the importance of a high security culture in the process of ensuring communication security.

Course objective

To impart knowledge of the culture of information security necessary for the proper design, management and improvement of security systems, and to develop skills for solving security problems. To raise awareness of information security risks in an environment of information overload and accelerated development of information and communication technologies, with a focus on organizational emergencies.

Course-related learning outcomes

Knowledge:

1. The student has an in-depth knowledge of the economic, legal, ethical, social and psychological aspects considered in professional activities in the area of communication determinants in safety engineering and crisis management [K2_W10].
2. The student has an in-depth knowledge of the principles of information flow and communication

specific to the field of safety management of organizations [K2_W15].

Skills:

1. The student is able to communicate on issues specific to security engineering and crisis management, is able to adapt the form of communication to a diverse audience, and is able to debate and participate in the debate on safety in the broad sense [K2_U11].
2. The student is able to interact with others in teamwork to solve a social communication problem specific to the field of safety engineering and crisis management, as well as take leadership roles in these teams [K2_U13].

Social competences:

- 1 The student correctly identifies and resolves dilemmas related to security in the broadest sense, understands the need to make the public aware of the need to form a high culture of information safety and counteract disinformation [K2_K02].
2. The student is ready to perform tasks related to the management of communication in the organization in a safe and ethical manner, to urge others to adhere to the principles of professional ethics and to develop professional values in the field of social communication [K2_K05].

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

formative assessment:

Lecture: knowledge is verified by short tests after the third and fifth didactic units, concerning the solution of the problem task. Passing threshold: 51%.

Project: social skills and competences are verified by issuing partial grades resulting from the subsequent parts of the project presented within the prescribed period. Passing threshold: 51%.

summary assessment:

Lecture: knowledge is verified through a summary test on the basic concepts and problems in the area of information security. Passing threshold: 51%.

Project: average of partial grades of the substantive evaluation of the project + grade for the editorial level. Passing threshold: 51%.

Grading scale:

91-100 - 5

81-90 - 4,5

71-80 - 4

61-70 - 3.5

51-60 - 3

Programme content

Risk analysis in the context of information security, the threat of infodemic, social responsibility, methods of shaping the culture of information security.

Course topics

Lecture: The 21st century as the age of information. Communication as a tool in the security process. Culture in society. Culture of the organization. Work culture. Culture of safety. Study of safety culture. Social potential for safety. Formation of pro-safety behavior in society and social responsibility. Role of the individual, role of the group, role of the employer. Work techniques (individual/team). Emotions and motivation in/for work and commitment to safety improvement. Social competencies necessary in information security processes, emotional competence, ethical sensitivity, interpersonal communication. Communication at the operational level: ability to argue, persuade, resolve conflicts, lead discussions, make presentations. Communication in difficult and/or crisis situations. Communicating about disaster, victims, death of loved ones. Social support in traumatic stress reduction. Risk management in information security, the process of risk management in information security and how it works, risk estimation, risk handling, acceptable risk, residual risk, risk monitoring and review, methods of assessing the effectiveness of safeguards in information security). Security culture in an information saturation environment. Information culture in an information warfare environment. Formation of information security culture. The role of the media in the process of forming information security culture. The risk of infodemia.

Project: preparation of a project entitled How to counter infodemia in a crisis organization? Guidelines for the project. Editorial requirements. Analysis of the theoretical assumptions for the project. Research problem and research questions. Selection of the research method and technique. Implementation of the various stages of the project..

Teaching methods

Lecture: multimedia presentation illustrated with examples, informative lecture, conversational lecture. The lecture is conducted using distance learning techniques in a synchronous mode. Acceptable platforms: eMeeting, Zoom, Microsoft Teams.

Project: multimedia presentation illustrated with examples given on the blackboard and performance of project tasks.

Breakdown of average student's workload

	Hours	ECTS
Total workload	60	2,00
Classes requiring direct contact with the teacher	30	1,00
Student's own work (literature studies, preparation for laboratory classes/ tutorials, preparation for tests/exam, project preparation)	30	1,00
