

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Social psychology [S1IBiJ1>PS]

Course

Field of study

Safety and Quality Engineering

Year/Semester

1/1

Area of study (specialization)

–

Profile of study

general academic

Level of study

first-cycle

Course offered in

Polish

Form of study

full-time

Requirements

compulsory

Number of hours

Lecture

15

Laboratory classes

0

Other (e.g. online)

0

Tutorials

30

Projects/seminars

0

Number of credit points

4,00

Coordinators

dr hab. Joanna Sadłowska-Wrzesińska prof. PP
joanna.sadlowska-wrzesinska@put.poznan.pl

dr inż. Żaneta Nejman
zaneta.nejman@put.poznan.pl

Lecturers

Prerequisites

Students entering this course should have a general knowledge of high school level and a demonstrated interest in security issues.

Course objective

The aim of the course is to familiarize Students with the essence and tasks of social psychology in the context of building a safe environment for work, learning and extra-occupational activity and to acquire by Students the ability to recognize the key mechanisms of behavior.

Course-related learning outcomes

Knowledge:

1. Describes basic concepts and the scope of social psychology, including cognitive dissonance theory, processes of forming social attitudes, and mechanisms of social influence [K1_W08].
2. Explains principles of social influence, such as the rules of reciprocity, commitment and consistency,

social proof, liking and sympathy, authority, and scarcity, identifying their significance in the context of social behaviors [K1_W08].

3. Characterizes psychological aspects of aggression, conformity, stereotypes, and prejudice, as well as prosocial behaviors, explaining why people help others [K1_W08].

Skills:

1. Analyzes and critically evaluates information regarding social influence and its mechanisms, applying acquired knowledge to interpret social behaviors in various contexts [K1_U01].

2. Uses different communication techniques to effectively influence social behaviors and attitudes, both in professional environments and beyond [K1_U02].

3. Recognizes socio-technical, organizational, and economic aspects affecting behaviors in groups and organizations, using social psychology to analyze and solve engineering tasks [K1_U03].

4. Participates in debates and presents issues related to social psychology, using appropriately selected communication means to emphasize the importance of safety and quality in the context of engineering [K1_U09].

Social competences:

1. Demonstrates professionalism and adheres to the principles of professional ethics, using knowledge from social psychology to promote respect for diversity and build a culture of safety and quality in the workplace and beyond [K1_K06].

2. Develops interpersonal skills and the ability to work in a team, forming attitudes based on understanding and respect for different viewpoints, contributing to more effective communication and conflict resolution [K1_K06].

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Formative assessment:

Lecture: knowledge is verified by short colloquia after the third and sixth teaching unit (problem tasks).

Pass mark: 50% +1.

Exercises: skills and social competences are verified through the use of partial marks, resulting from: work in teams; activity bonuses; solving problems independently. Credit threshold: 50% +1.

Summative assessment:

Lecture: knowledge is verified by a written colloquium on basic concepts and problems of social psychology. Pass mark: 50% +1.

Exercises: average of partial marks. Pass mark: 50% +1. Project: average of partial grades + grade for editing level of the project. Pass mark: 50% +1.

Programme content

Basic concepts of social psychology. Formation of social attitudes. Rules of social influence. Pro-social behavior. Aggression. Conformism. Stereotypes and prejudices.

Course topics
