

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Protection of intellectual property [N1Log2>OWI]

Course

Field of study

Logistics

Year/Semester

3/6

Area of study (specialization)

–

Profile of study

general academic

Level of study

first-cycle

Course offered in

Polish

Form of study

part-time

Requirements

compulsory

Number of hours

Lecture

10

Laboratory classes

0

Other (e.g. online)

0

Tutorials

0

Projects/seminars

0

Number of credit points

1,00

Coordinators

dr Jakub Pawlak

jakub.pawlak@put.poznan.pl

Lecturers

Prerequisites

The student should have a basic knowledge of economics and management as well as law. The student should have the skills to perceive and solve basic problems related to intellectual property protection. The student should understand the need and present attitudes conducive to and encouraging creative thinking.

Course objective

1. To provide students with basic knowledge regarding intellectual property protection and management to a certain extent 2. Developing students' skills to solve problems related to intellectual property 3. Developing teamwork skills in students

Course-related learning outcomes

Knowledge:

knows the basic concepts and principles of industrial property protection and copyright [P6S_WK_09]

Skills:

1. The student is capable of recognizing the systemic, non-technical, and socio-technical aspects in engineering tasks, as well as the organizational, economic, and legal protection associated with

technical solutions. [P6S_UW_04]

2. The student can identify changes in requirements, standards, regulations, technological advancements, and the job market related to intellectual property protection, and based on these, determine the need for further knowledge enhancement. [P6S_UU_01]

Social competences:

1. The student is aware of initiating actions aimed at legally securing the intellectual resources of an organization, particularly activities related to formulating and transmitting information and collaborating within society in the logistics domain. [P6S_KO_02]

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Formative assessment:

1) Case study

2) Final test in form of a single or multiple choice test

Assessment criteria: 50.1% - 70% = 3; 70.1% - 90% = 4; over 90% = 5

Programme content

Patents, utility model, industrial design, copyright, law on the Internet

Course topics

The "Intellectual Property Protection" course covers a wide range of topics related to the protection of innovation and creativity. In the context of patents, it discusses definitions, procedures for obtaining patents, the scope of protection, and methods of enforcing patent rights. Utility models are presented as an alternative to patents, focusing on the registration procedure and differences in protection. Industrial designs concentrate on the protection of the aesthetic features of products, including the application process and principles of protection. Copyright law deals with the protection of literary, musical, artistic, and scientific works, covering personal and property rights, as well as the rules for using such works. Internet law analyzes aspects of intellectual property protection in the digital environment, including online copyright issues, domain name matters, and the challenges of infringements and protection measures on the web.

Teaching methods

Traditional lecture, seminar lecture (multimedia presentation, presentation illustrated with examples on the board, case study with discussion).
